

AWS, Snowflake, and Microsoft Partnerships Cement Clariant's Role in Enterprise Digital Transformation

Clariant deepens enterprise transformation capabilities through long-standing alliances with the world's most trusted technology platforms

NEW YORK CITY, NY, UNITED STATES, July 7, 2025 /EINPresswire.com/ -- [Clariant](#), a U.S.-based

“

Clients come to us with complex questions. These partnerships allow us to respond not with theory, but with tools that work, teams that understand them deeply, and roadmaps that reflect experience.”

Harjeet S. Gulati

technology company known for building intelligent systems for enterprise clients, reaffirmed its commitment to delivering platform-led transformation through its partnerships with Amazon Web Services (AWS), Snowflake, Databricks, Salesforce and Microsoft.

These partnerships, developed and matured over several years, have allowed Clariant to work closely with product and cloud leaders across industries. From CRM to cloud-native infrastructure, Clariant builds systems that simplify operations, improve compliance, and help clients adapt to the demands of scale.

“What makes these partnerships valuable isn't just the access, they give us a working fluency with platforms our clients rely on every day,” said [Harjeet Gulati](#), CEO of Clariant.

Clariant's certified capabilities include:

- (1) Partner recognition and competencies under the AWS Select Tier, with core strengths in data architecture, DevOps, and machine learning workflows
- (2) Deployment and optimization expertise in Salesforce includes experience in service automation, CRM customization, and healthcare integrations
- (3) Full-stack cloud application development as a Microsoft Solutions Partner for App Innovation, including secure, scalable Azure-based builds
- (4) End-to-end solutioning on Databricks, with expertise in large-scale data processing, AI/ML pipeline orchestration, and real-time analytics delivery
- (5) Optimization and integration capabilities on Snowflake, including cloud-native warehousing, cross-cloud data sharing, and advanced analytics on semi-structured data

For clients, these partnerships translate into greater confidence, shorter deployment timelines, and solutions that are designed to grow. Whether it's rethinking operations or modernizing critical infrastructure, Clariant works at the intersection of trusted platforms and tailored solutions.

Clariant will continue to invest in platform training, co-development programs, and delivery accelerators throughout 2025 to further strengthen its ability to support global clients across regulated and fast-moving sectors.

About Clariant

Clariant is a global AI-native firm specializing in enterprise transformation through intelligent systems, digital engineering, and experience innovation. With deep expertise across healthcare, life sciences, public sector, and emerging industries, Clariant helps organizations accelerate growth, solve complex problems, and lead with clarity.

Operating across four continents and supporting clients in over 15 countries, Clariant combines applied AI, product design, and enterprise strategy to deliver measurable outcomes in high-stake environments.
