

# eCommunity™ Fiber and ECSite Deliver Unified Smart City Management for City of Morrow

*ECSite monitoring and dashboard integrates Morrow's eCommunity™ Fiber systems into a unified platform*

MORROW, GA, UNITED STATES, July 9, 2025 /EINPresswire.com/ -- eCommunity™ Fiber, a leading open-access fiber network provider, today announced its partnership with ECSite, a software systems provider, to implement an integrated dashboard solution for the City of Morrow's smart city infrastructure. ECSite's platform provides a centralized, real-time view of the status of both passive (fiber) and active (LoRaWAN IoT, wireless) systems deployed across the city.

This integrated dashboard offers Morrow city officials and IT staff a comprehensive overview of their entire smart city network. By linking all LoRaWAN-enabled IoT devices and wireless connectivity points into a single interface, ECSite's system simplifies monitoring, management, and troubleshooting. This unified visibility is crucial for ensuring the efficient operation of various smart city applications, from environmental sensors and public asset management to wireless connectivity and future intelligent systems.

The ECSite dashboard provides real-time status updates, alerts for potential issues, and historical data analysis, empowering the city to proactively manage its infrastructure, optimize

resource allocation, and ensure the seamless delivery of smart services to its residents and businesses. This enhanced visibility contributes to increased operational efficiency, reduced downtime, and a more responsive smart city ecosystem.

“We are pleased to be working with A2D in their City of Morrow smart city transformation initiative,” said Subbu Meiyappan, CEO and Founder of ECSite. “Having a unified view - a single

pane of glass - of all systems and applications that are part of the smart city implementation will be transformational for the City. ECSite’s integrated monitoring service and dashboards provide the City with real-time insights to effectively manage the network, ensure reliability, and deliver the performance of all the smart city applications powered by A2D’s eCommunity™ Fiber robust infrastructure. A2D has been great to partner with. They bring in-depth experiences in fiber deployment at scale.”
