

CloudIBN Now Offering Premier VA&PT Services Across India

CloudIBN now delivers premier VA&PT services across India, helping businesses detect vulnerabilities, ensure compliance, and strengthen cybersecurity posture.

PUNE, MAHARASHTRA, INDIA, July 8, 2025 /EINPresswire.com/ -- CloudIBN, a renowned leader in cloud consulting and cybersecurity, is proud to announce the launch of its premier VA&PT (Vulnerability Assessment & Penetration Testing) services across India. As cyber threats intensify and regulatory mandates increase, CloudIBN's advanced [VAPT Services](#) aim to empower Indian businesses, government agencies, and institutions with proactive protection, compliance readiness, and unwavering trust.

India's Rising Demand for Cyber Vigilance

With rapid digitization—from fintech and e-commerce to smart cities and healthcare—India has become a prime target for cybercriminals. According to recent reports, cyberattacks and misconfigurations are increasing at an alarming rate. CloudIBN's response is to offer VA & PT Services at scale, ensuring robust protection through enterprise-grade VA&PT solutions.

What Makes CloudIBN's Premier VA&PT Stand Out

1. Drawing on over 26 years of experience and global certifications (ISO 9001, ISO 27001, 20000), CloudIBN's offerings include:

CloudIBN VAPT Services

2. End-to-End Security Testing—covering web, mobile, network, API, cloud, IoT, and source code.
3. Cutting-Edge Techniques—combining automated scanning with expert manual penetration analysis.
4. Compliance-Ready Reports—structured for RBI, SEBI, CERT-In, PCI DSS, GDPR, and more.
5. Post-Test Support—remediation guidance, retesting, and enhanced security posture.
6. 24×7 Managed Security—continuous monitoring via SOC/mSOC plus vapid advisory.

These features support proactive security strategies and position CloudIBN as the top choice for Indian enterprises seeking unlimited protection at scale.

Service Breakdown: Premier VA&PT Across India

1. Network Infrastructure VAPT

Identifies weaknesses in servers, routers, firewalls, and other critical assets. Automated scans and manual exploitation highlight vulnerability paths before attackers can exploit them.

2. Web & Mobile Application VAPT

Targets OWASP Top 10 issues, SQL injection, XSS, API missteps, and insecure mobile app logic—fortifying both customer-facing and internal tools.

3. Cloud VAPT

Assesses cloud infrastructure (AWS, Azure, GCP): IAM misconfigurations, exposed data, insecure serverless APIs. Offers tailored remediation aligned with PCI-DSS and ISO frameworks.

4. API & IoT VAPT

Protects modern integrations and device endpoints—from weak encryption to insecure communication channels.

5. Source Code Review & Threat Simulation

Detects flaws at the code level and simulates blue-team, red-team, and phishing scenarios. Human-led reviews expose business logic faults and chained exploits that automated tools miss

Ensure your business is audit-ready. Schedule your premier VAPT Audit today:

CloudIBN's Nationwide Roll-Out Strategy

To serve Indian enterprises seamlessly, CloudIBN has:

1. Established localized teams in major tech hubs (Mumbai, Delhi NCR, Bangalore, Chennai)
2. Deployed remote and onsite modalities for flexible engagements
3. Integrated SOC/mSOC to complement VAPT findings with real-time defense

This platform supports both single-assessments and periodic assessments—keeping pace with

evolving infrastructure and threats.

India's digital journey demands premier protection. By rolling out its premier [VAPT Audit Services](#), CloudIBN reaffirms its position as India's foremost cybersecurity partner—one that combines global best practices with localized understanding and rapid, large-scale delivery.
