## Driving Factors

Increase in demand for real-time supply chain analysis, development of industrial-grade digital technology, and upsurge in need for improved supply chain visibility drive the growth of the global SaaS-based SCM market. However, security concerns over cloud deployment among enterprises restrain the market growth. On the other hand, rise in ICT spending and adoption of SaaS-based SCM software by healthcare and pharmaceutical companies create new opportunities in the coming years.

## Market Segmentation

The SaaS-based SCM market is segmented on the basis of solution, deployment, user type, industry vertical, and region. By solution, the market is bifurcated into software and services. By deployment, the market is divided into public, private, and hybrid. By user type, it is bifurcated into large enterprises and small & medium-sized enterprises (SMEs). Depending on industry vertical, it is classified into consumer goods, retail, food & beverages, healthcare & pharmaceuticals, manufacturing, logistics & transportation, and others. By region, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

The software segment to continue its leadership status during the forecast period

Based on solution, the software segment accounted for the highest market share in 2020, contributing to nearly two-thirds of the global SaaS-based SCM market, and is projected to continue its leadership status during the forecast period. This is attributed to high level of cost savings on the total cost of ownership and increase in need for real-time material monitoring and forecasting of production plan by companies operating in several industry verticals including consumer goods, retail, manufacturing, and others. However, the service segment is expected to manifest the highest CAGR of 15.6% from 2021 to 2030, owing to effective functioning of platforms and software.

The consumer goods segment to maintain its dominance during the forecast period

Based on industry vertical, the consumer goods segment contributed to the highest market share in 2020, accounting for more than one-fifth of the global SaaS-based SCM market, and is estimated to maintain its dominance in terms of revenue during the forecast period. This is attributed to smooth synchronization among in-store, online, and mobile applications for consistent consumer experience and ensuring collaboration between stakeholders for personalized customer service. However, the healthcare and pharmaceuticals segment is projected to manifest the fastest CAGR of 17.1% from 2021 to 2030, owing to the need to reduce overall costs, application of advanced technologies, and implementation of new capabilities, such as digital technology and agility.

North America to maintain its lead position by 2030

Based on region, North America contributed the highest market share in terms of revenue in 2020, accounting for around two-fifths of the global SaaS-based SCM industry, and is projected to maintain its lead position by 2030. This is attributed to surge in spending on transportation & logistics that improves the implementation of automation technologies in logistics and supply chains and adoption from the transportation & logistic industry in the region. However, Asia-

Pacific is estimated to register the fastest CAGR of 15.1% during the forecast period, owing to strong economic growth and ongoing development in the services sector that led business enterprises to invest heavily in SaaS-based SCM to sustain the growth and improve productivity.

### COVID-19 Scenario

□ Owing to the outbreak of the Covid-19 pandemic, various industries were affected and it became increasingly difficult to maintain the complex supply chain networks. This, in turn, raised the demand for SaaS-based SCM.

□ According to the survey conducted by Institute for Supply Chain Management Organization in March 2020, nearly 75% of the companies highlighted the SCM disruptions in one form or other. This surged the need for supply chain visibility and increased adoption of SaaS-based SCM.

□ Enterprises across the globe have been reviewing their supply chain strategies and becoming collaborative, resilient, and cooperative with clients, suppliers, and other stakeholders.
