A high number of outsiders, including people with disabilities, in the United States and abroad are increasingly interested in the project for better design and prosthetic devices that will help its members participate in competitions and sports and entertainment. Evaluation of the performance of any project is based on proper footing design, space design, materials, structure and equipment. Another important thing is the physical condition of the person cutting. A prosthesis cannot supplement an atrophied muscle, limited range of motion or insufficient strength of an amputee.
