

# MyBTCX.com Enables Apple Pay for Global Crypto Purchases

*Apple Pay now supported on MyBTCX.com, enabling secure global crypto purchases in seconds with iPhone, iPad, Apple Watch or Mac across 27+ fiat currencies.*

SAN FRANCISCO, CA, UNITED STATES, July 9, 2025 /EINPresswire.com/ -- A Frictionless Experience for [Crypto](#) Investors Worldwide

MyBTCX.com

The international crypto purchase platform [MyBTCX.com](#) has expanded its global payments offering by integrating [Apple Pay](#), Apple Inc.'s mobile wallet and payment service. This development enables individuals in more than 130 countries to purchase Bitcoin (BTC), Ethereum (ETH), and dozens of other leading cryptocurrencies with just a few taps on their Apple devices.

“

Buying cryptocurrency worldwide with local payment methods has never been easier. MyBTCX.com empowers users with crypto access using Visa, Mastercard, Apple Pay, Google Pay, PayID, SEPA, PIX and more.”

*Duane Seamans*

Through this integration, users can now use Apple Pay on compatible iPhone, iPad, Mac, and Apple Watch devices to execute cryptocurrency purchases easily and safely, without manually entering card details or undergoing time-consuming verifications. Transactions are processed via trusted third-party partners with encryption and tokenization technologies ensuring sensitive information is never shared with merchants — or even stored by Apple itself.

Expanding Access to Cryptocurrency via Familiar

Technology

Launched in 2014, Apple Pay has become a widely trusted payment method and is now accepted in over 80 countries. Its adoption within the digital finance ecosystem is accelerating, with millions relying on it for secure, fast transactions. Through its partnership with Banxa,

MyBTCX.com offers Apple Pay support in 27+ fiat currencies, including USD, EUR, GBP, AUD, CAD, INR, and JPY — allowing for near-instant settlement of crypto purchases across North America, Europe, Asia, and other regions.

Supported Fiat Currencies Include:

USD – US Dollar

EUR – Euro

GBP – Pound Sterling

AUD – Australian Dollar

CAD – Canadian Dollar

INR – Indian Rupee

JPY – Japanese Yen

PHP – Philippine Peso

...and 20+ more.

MyBTCX.com ensures customers in countries without native Apple Pay support can still transact using Apple Pay as long as their card is denominated in a supported currency.

A Frictionless Experience for Crypto Investors Worldwide

By removing the need for manual card entry or reliance on slow-moving bank infrastructure, Apple Pay on MyBTCX.com creates an intuitive payment experience. Users benefit from:

Speed – Most transactions complete in seconds

Security – Biometric authentication and dynamic security codes protect each payment

Privacy – Card data is never shared or stored

Familiarity – Millions already use Apple Pay daily, creating a low-friction onramp to crypto

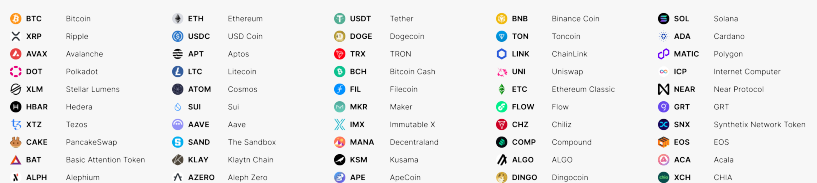

All cryptocurrency purchases on MyBTCX.com are non-custodial by design — assets are delivered directly to the destination wallet address provided by the buyer, promoting true self-custody.

Buy Crypto with Apple Pay

Buy Bitcoin with Apple Pay

MyBTCX supports a wide variety of cryptocurrencies

## Cryptocurrencies Available with Apple Pay

The Apple Pay integration supports a broad selection of digital assets, including but not limited to:

Bitcoin (BTC)

Ethereum (ETH)

Tether (USDT)
