

Red Piranha Launches Managed XDR Networking Service and Enhances Partner Program

Streamlined Crystal Eye deployments, Zero Trust security, and improved partner incentives are now available.

MELBOURNE, VICTORIA, AUSTRALIA, July 9, 2025 /EINPresswire.com/ -- Red Piranha, Australia's leading developer and manufacturer of advanced cybersecurity solutions, is pleased to announce the launch of its new Managed Extended Detection and Response (MXDR) Networking Engineering Service, purpose-built to support its MSP and channel partners with faster, more secure Crystal Eye deployments.

This new service delivers hands-on engineering assistance to deploy Crystal Eye appliances into customer environments, aligned to Zero Trust and secure-by-design principles. Once deployed, systems are professionally hardened and handed over to the partner, ready for production, dramatically reducing the partner's deployment time and internal engineering costs.

“

We're committed to making it easier for our partners to grow securely and profitably. These service enhancements and program updates are a direct result of partner feedback and evolving market needs.”

Adam Bennett, CEO, Red Piranha

For partners seeking longer-term support, the MXDR service also extends to include full lifecycle management, with ongoing change control, configuration lockdown, and operational oversight, allowing partners to scale their managed services without increasing overhead.

At the same time, Red Piranha is pleased to announce a series of enhancements to our [Partner Assurance](#)

[Program](#), including:

- Increased partner commissions and rebates across the entire Crystal Eye platform and

supporting services

- Expanded credit access through our Networking Engineering Credit Program
- Enhanced service margins for partners delivering managed security solutions backed by Red Piranha

The combination of deployment support and expanded benefits means Red Piranha partners can deliver faster outcomes, increase profitability, and maintain high security assurance across all customer environments.

MSPs interested in leveraging the new MXDR Networking Service or accessing the updated partner incentives should contact their Red Piranha Account Manager today.
