In 2020, the Europe range hood and cooktop market accounted for nearly 35% of the global range hood and cooktop market. The range hood market is currently holding a major share and is expected to grow with highest

CAGR over the coming years. Product innovation is further driving the market growth and enticing consumers toward the segment.

The global range hood and cooktop market is emerging at a considerable pace owing to several factors such as increase in compatibility of the appliances, enhanced internet penetration, changes in lifestyle patterns, and growth in concerns about energy prices fuel the increase in sales of the household appliances market. Over the years, there has been an increase in the women workforce; and therefore, families rely on different appliances for comfort. These appliances also help ease the chores and save time.

The manufacturers are focusing on brand awareness, market penetration, and supply chain network to fulfil the demand from consumer's side. According to the report published by the JETIR 2019, advertisement plays an important role with an effectiveness of ~70% as a source of awareness of home appliances. These innovations in marketing strategies along with the digitization are placing demands in range hood and cooktop market, but also open up major opportunities to the marketers.

Manufacturers in the kitchen appliances market are continuously developing products with enhanced functionality and features to remain competitive. Despite developing products with higher added value, the prices for the products have collapsed and thus, remained stagnant at a low level for several years. The decrease in price was due to the pressure of competition from countries with low manufacturing costs. Manufacturers are also facing pressure related to margins owing to fierce competition in the market. This decrease in price is forcing companies to develop innovative products and is encouraging customers to purchase the range hoods and cooktop. This, in turn, drives the range hood and cooktop market growth.

The [range hood and cooktop industry](#) is segmented into type, user application, mode of sales, and region. By region, it is analyzed across North America (U.S., Canada, and Mexico), Europe (Germany, Spain, U.K., Italy, France, and rest of Europe), Asia-Pacific (China, India, Japan, Australia, South Korea, and Rest of Asia-Pacific), and LAMEA (Brazil, South Africa, Saudi Arabia, and rest of LAMEA).

Based on region, Europe, followed by North America, held the highest market share in terms of revenue 2020, accounting for more than one-third of the global range hood and cooktop market, owing to the huge and aware consumer base, well established electronics market, and rising consumer interest over kitchen appliance in the market. Moreover, the Asia-Pacific region is expected to witness the fastest CAGR of 5.6% during the forecast period, owing to the increasing industrialization, westernization, and rise in business opportunities in the kitchen appliances market in the region.

Analyst Review

According to the CXOs of leading companies, the global range hood and cooktop market is

emerging at a considerable pace owing to several factors such as increase in compatibility of the appliances, enhanced internet penetration, changes in lifestyle patterns, and growth in concerns about energy prices fuel the increase in sales of the household appliances market. Over the years, there has been an increase in the women workforce; and therefore, families rely on different appliances for comfort. These appliances also help ease the chores and save time. Moreover, Asia-Pacific and LAMEA are projected to register a significant growth as compared to the saturated markets of Europe and North America, due to rapid urbanization, increase in penetration of technology even in small cities, growth in disposable income, and improvement in standard of living. In line with increase in environmental concerns, consumers prefer to buy appliances that are eco-friendly and energy efficient. Therefore, manufacturers take steps to improve the product efficiency and reduce e-waste.
