

Shooting Ranges Market Study, Trends, Segmentation, Detailed Analysis And Forecast by 2031

Rise in investments made by law enforcement & military agencies in firearms training across departments, participation of youngsters in indoor & outdoor sports.

WILMINGTON, DE, UNITED STATES, July 10, 2025 /EINPresswire.com/ --

[Shooting ranges market size](#) was estimated at \$1.1 billion in 2021 and is expected to hit \$2.4 billion by 2031, registering a CAGR of 8.3% from 2022 to 2031.

The global shooting ranges market is experiencing growth due to several key factors, including increased investments by military and law enforcement agencies in firearms training across various departments. Additionally, the rising interest among youth in both indoor and outdoor shooting sports, along with the surging demand for advanced shooting range technologies particularly in developing regions is further propelling market expansion.

Shooting ranges are controlled environments designed for weapons training, testing, and recreational shooting, and sometimes archery. These facilities can be indoor, outdoor, or virtual, and are often located on city outskirts or in rural settings. Key components typically include firing points, targets, backstops, wind flags, and lighting systems. While originally intended for military and law enforcement use, shooting ranges are increasingly being used by civilians for leisure and sport in a safe and environmentally responsible setting.

Depending on their purpose, ranges may specialize in certain firearms, such as pistols or long guns, or cater to specific disciplines like Olympic trap/skeet shooting or 10-meter air rifle/pistol events. Indoor ranges often have stricter regulations, usually prohibiting rifles, high-powered

calibers, or automatic firearms for safety and structural reasons.

The demand for technologically advanced shooting range equipment, particularly in developing economies, and an increase in investments made by law enforcement and military organizations in firearms training across departments, as well as rising youth participation in indoor and outdoor sports, are all projected to have an impact on the growth of the global shooting ranges market during the forecast period. The cost of installing a shooting range and the lack of suitable land, however, are anticipated to restrain the expansion of the global market over the forecast period.

The key market players analyzed in the global [shooting ranges industry](#) report include InVeris Training Solutions, Action Target, Inc., Range Systems, Inc., Cubic Corporation, Virtra Training Systems, Inc., and Saab AB. These market players have embraced several strategies including partnership, expansion, collaboration, joint ventures, and others to highlight their prowess in the industry. The report is helpful in formulating the business performance and developments by the top players.
