Large screen displays are a class of large display screen formats, which improve the visual experience with its professional-grade image quality and are mostly used for endorsing and advertising. They are designed for applications that require the vendors to engage their customers/audiences with its wider viewing angle and to extract maximum effectiveness from

the marketing messages. Large screen displays are mostly suited for retail store, lobby, control room, or other professional application.

Rise in demand for bright and power-efficient display panels, rapid digitalization, and decline in demand for traditional billboards are the factors that drive the growth of the [U.S. large screen display industry](#). However, deployment of widescreen alternatives such as projectors and screenless displays, is expected to hinder the market growth. Moreover, emerging display technologies such as MicroLED & quantum dots and increase in preference of electronic giants toward large screen displays, are expected to offer huge U.S. large screen display market opportunities in the coming years.

The U.S. large screen display market is segmented on the basis of screen size, application, product, location, end user, and region. By screen size, the market is classified into 80 Inch to 99 Inch, 100 inch to 149-inch, 150 inch to 199-inch, 200 inch to 300 inch, and above 300-inch segments. In 2020, the 80 Inch to 99 Inch segment secured highest revenue share and is expected to follow same trend during forecast period. Based on application, the market is divided into B to B and B to C applications, among which B to B segment is expected to dominate the U.S. large screen display market share.

Based on application, the B to B segment contributed to around four-fifths of the U.S. large screen display market in 2020, and is expected to lead the trail by 2030. Rise in internet penetration and digitalization has led to the development of advanced display system. The corporates are using large screen displays for various purposes such as command & control, conferencing & collaboration, digital signage, training & induction, and others in various day to day activities, thus propelling the segment growth.

Based on location, the indoor segment accounted for nearly three-fifths of the U.S. large screen display market revenue in 2020, and is anticipated to rule the roost by the end of 2030. This is due to the fact that indoor displays help drive highly targeted marketing campaign to audience within premises, engage people, and enhance advertising and broadcasting information within industries. The outdoor segment, on the other hand, would manifest the fastest CAGR of 12.6% during the forecast period.

Based on end user, the corporate segment held the major share in 2020, generating nearly one-fifth of the U.S. large screen market. Increase in adoption of large screen displays in conference rooms, cafeterias, and work floors help engage their employees, and visitors. This is because interactive wayfinding can give every patients and visitors enhanced sense of well-being, safety, and security. These displays are also installed in office entrances for security, thus driving the segment growth. The healthcare segment, on the other hand, would portray the fastest CAGR of 12.4% from 2021 to 2030.

The key players profiled in the report include NEC, Sony, LG, Samsung, Panasonic Corporation of North America, ViewSonic Corporation, Volanti Displays, iSEMC (HHSD), Koninklijke Philips N.V., and Tabler System Inc. This market players have adopted various strategies such as product launch, collaboration & partnership, joint venture, and acquisition to expand their foothold in the U.S. large screen display industry.

#### Key Benefits For Stakeholders:

- This study comprises analytical depiction of the U.S. large screen display market opportunities along with the current trends and future estimations to depict the imminent investment pockets.
- The overall U.S. large screen display market analysis is determined to understand the profitable trends to gain a stronger foothold.
- The report presents information related to key drivers, restraints, and opportunities with a detailed impact analysis.
- The U.S. large screen display market forecast is quantitatively analyzed from 2021 to 2030 to benchmark the financial competency.
- Porter's five forces analysis illustrates the potency of the buyers and suppliers in the industry.
- The report includes the market of key vendors and U.S. large screen display market trends.

#### Reasons to Buy This U.S. Large Screen Display Market Report:

- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.
- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.
- Classify potential new clients or partners in the target demographic.
- Develop tactical initiatives by understanding the focus areas of leading companies.
- Plan mergers and acquisitions meritoriously by identifying Top Manufacturer.
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and Scope.
- Report will be updated with the latest data and delivered to you within 2-4 working days of order.
- Suitable for supporting your internal and external presentations with reliable high-quality data and analysis.
- Create regional and country strategies on the basis of local data and analysis.
