Real Feedback from Millions of Buyers

This score is not based on a small group. It comes from a detailed 'sentiment analysis' of the experiences and thoughts of millions of automobile owners. This means looking at the true feelings related to owning an automobile, from the expected reliability customers count on in a Nissan truck to the smart technology in an electric vehicle like the ARIYA.

A Brand That Actively Connects

The report also measures 'engagement.' This figure shows how much people are talking about Nissan, looking for details, and telling others about their good experiences. It indicates a brand that resonates deeply and fosters a connected community.

Also, Nissan's strong 'visibility' score means it's a known and respected name when making key automobile choices. Nissan's consistent place in the top five for six straight years gives solid signs of lasting quality and widespread owner satisfaction.
