

# Powerledger's TraceX is now integrated with ERCOT, opening up access to the US's largest renewable market

NEW YORK, NY, UNITED STATES, July 14, 2025 /EINPresswire.com/ --

[Powerledger](#), a leading energy software company has announced the official integration of its [REC marketplace, TraceX](#) with [ERCOT \(Electric Reliability Council of Texas\)](#), opening seamless access to one of the most dynamic renewable energy markets in the United States.

With this integration, commercial & industrial (C&I) buyers, brokers, and traders can now access, compare, and purchase ERCOT renewable energy certificates (RECs) directly via TraceX, with full price transparency, simplified settlement, seamless retirement & certification, and less administrative overhead.

“

ERCOT represents a massive opportunity for clean energy buyers. With TraceX, we're removing friction from the process, making REC procurement faster, more transparent, and accessible to everyone.”

*Daniel Walsh, VP Sales, TraceX*

## Unlocking a High-Value REC Market:

ERCOT manages approximately 90% of Texas' electric load. In 2023, the Texas region generated over 32 million unbundled RECs, primarily from wind and solar. It has become a strategic hub for REC procurement, particularly for corporates looking to meet ESG mandates and brokers looking for efficient REC strategies.

## Key Features of the ERCOT Integration with TraceX

- Seamless ERCOT REC Listings: Instantly browse and compare RECs across wind, solar, and other sources.
- Advanced Filtering: Flexible REC search by vintage, location, facility and other attributes.
- Price Transparency: Make informed decisions with real-time pricing data.

- Frictionless Transactions: Automated processes enable faster REC transactions than OTC markets.
- Instant REC Retirement: Easily retire RECs within the platform with full traceability and access to retirement statements, ensuring compliance and audit readiness.
- Secure REC trades: Explore REC trades enabled with pre-validated participants, US banking compliant KYC, and on-platform payments.

#### Custodian REC Holding & Retirement for Market Access:

For corporate sustainability teams, ESG leaders and SMBs, TraceX offers a custodian REC holding and retirement service, enabling easy access to certified RECs without maintaining a registry account. With one click, users can retire RECs and instantly download official proof, simplifying compliance and audit readiness.

#### Streamlined REC Trading:

Unlike traditional OTC REC markets burdened by manual processing and settlement delays, TraceX automates every step, from onboarding to transaction to retirement. This empowers both large-scale buyers and emerging clean energy participants to move faster and operate more efficiently in the market.

“ERCOT represents a massive opportunity for clean energy buyers. With TraceX, we’re removing friction from the process, making REC procurement faster, more transparent, and accessible to everyone,” said Daniel Walsh, VP Sales, TraceX.

For more information on how to start trading ERCOT RECs via TraceX, get in touch: [tracex@powerledger.io](mailto:tracex@powerledger.io)

#### About Powerledger

Powerledger is a software company that leverages blockchain technology to solve pressing energy challenges, enabling customers to access and trade cheaper, cleaner electricity and trade environmental commodities. Power utilities, governments, and large corporations use Powerledger’s solutions to be at the forefront of the energy transition by tracking, tracing, and trading every kilowatt hour of energy and trading of RECs. Headquartered in Zug, Powerledger is recognized as one of the top 50 companies in Crypto Valley, Switzerland.

# TraceX

by  Powerledger

TraceX the digital marketplace for seamless REC trading

## About TraceX

TraceX by Powerledger is an environmental commodities marketplace that uses purpose-built technology to enhance transparency in renewable energy certificates trading. Generators use TraceX to track Environmental Attribute Certificates (EACs) from issuance through to sale, transfer and retirement for the end buyer. Companies with ESG goals can use the platform to track ownership, hold certificates for resale, or retire them to meet annual sustainability targets. TraceX is also recognized as a WSA award winner for 'green energy and environment' category.
