

# Prime Editing and CRISPR Market Worth USD 23.493 Billion by 2030 at a CAGR of 24.3%

PORTLAND, IA, UNITED STATES, July 14, 2025 /EINPresswire.com/ -- According to the report published by Allied Market Research, the global [Prime Editing And CRISPR Market](#) was estimated at \$2.69 billion in 2020 and is expected to hit \$23.49 billion by 2030, registering a CAGR of 24.3% from 2020 to 2030. The report provides an in-depth analysis of the top investment pockets, top winning strategies, drivers & opportunities, market size & estimations, competitive scenario, and wavering prime editing and CRISPR market trends.

CRISPR is a family of DNA sequences found in genome of prokaryotic organisms. CRISPR technology is used for genome editing and allows researchers to change DNA sequence and modify gene function. It possess many applications such as correcting genetic defects in patients and enhancing yield in agriculture by cultivating genetically modified crops. Prime editing is one of the methods of gene editing designed for inserting, deleting, and base swapping of genes in living organisms. One of the major advantages of prime editing over CRISPR is that it does not depend upon ability of a cell to divide for making necessary changes in DNA. Prime editing and CRISPR technology are a set of advanced tools, often described as a molecular scissors for gene and used for alteration of DNA sequencing.

Advancements in R&D in genetic engineering, rise in demand for genetically modified crops, and surge in prevalence of chronic and genetic diseases drive the growth of the global prime editing and CRISPR market. On the other hand, several legal & ethical issues and lack of safety toward gene editing restrain the growth to some extent. However, increase in R&D activities by major key players and decrease in cost of genomic sequencing are expected to create multiple opportunities in the industry.

Increase in prevalence of sickle cell anemia, advancements in technology for genetics, and surge in awareness regarding gene editing are anticipated to drive growth of the prime editing and CRISPR market. In addition, demand for targeted gene manipulation in biomedical research has led to increase in demand for these molecular scissors.

Prime Editing And CRISPR Market Segmentation:

By Application

The agricultural research segment held the major share in 2020, accounting for nearly half of the total market share. In addition, the segment is projected to retain the lion's share by 2030. Simultaneously, the biomedical research and therapy segment would cite the fastest CAGR of 25.00% from 2020 to 2030.

### By Region

North America accounted for the highest market share in 2020, generating nearly half of the global prime editing and CRISPR market. At the same time, the market across Asia-Pacific would manifest the fastest CAGR of 28.10% during the forecast period. The other provinces studied in the report include Europe and LAMEA.

### Key Players

The key market players analyzed in the global prime editing and CRISPR market report include CRISPR Therapeutics, GenScript Biotech, Beam Therapeutics, Integrated DNA Technologies (IDT), Horizon Discovery, Synthego Corporation, Intellia Therapeutics Inc., Inscripta, Precision Bioscience, and Sangoma Therapeutics. These market players have incorporated several strategies including partnership, expansion, collaboration, joint ventures, and others to brace their stand in the industry.

### Key Benefits For Stakeholders:

The study provides an in-depth analysis of the prime editing and CRISPR market, and the current trends and future estimations to elucidate imminent investment pockets

It presents a quantitative analysis of the prime editing and CRISPR market from 2021 to 2030 to enable stakeholders to capitalize on the prevailing market opportunities

Extensive analysis of the prime editing and CRISPR market based on procedures and services assists to understand the trends in the industry

Key players and their strategies are thoroughly analyzed to understand the competitive outlook of the prime editing and CRISPR market

### About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports Insights" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions

and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies, and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
