

Appsvio Launches Appsvio Test Management for Jira

Appsvio Test Management (ATM) is the first test management app to meet the newest data security standards on the Atlassian Marketplace.

WROCLAW, POLAND, July 14, 2025

/EINPresswire.com/ -- [Appsvio](#)

launches "[Appsvio Test Management](#)"

(ATM) app and proves that

comprehensive coverage of the QA process and simplicity can go hand in hand. ATM, the first fully Forge-built

test management app, is now available on the [Atlassian Marketplace](#) - designed to streamline QA processes for teams of all shapes and sizes.

Test Execution view with Appsvio Test Management

“

Appsvio fully utilized the best Forge has to offer to create real customer value. Achieving the Runs on Atlassian badge demonstrates strong commitment to customer data protection.”

James Dumay

ATM delivers powerful features, an intuitive experience, and enterprise-grade security - all within Jira. The app is built on Atlassian's infrastructure and easily mimics native design - seamlessly uniting tests with the rest of the development cycle in Jira. The add-on meets the newest data safety standards on the Atlassian Marketplace, ensuring no data egress and data residency compliance.

ATM features include, but are not limited to:

- A flexible Testing Setup: that allows to adjust the configuration to QA team needs and make collaboration

across teams easier.

- Coverage of the whole testing process in Jira: from requirements definition, through test design and execution, to defects collection.

- Native app design: by leveraging the best elements - work items, workflows, permissions and UI.

Software testing is a crucial part of every software development cycle and as the Agile approach

takes over the development process, Jira becomes the number product for tracking the whole cycle. Atlassian Marketplace offers solutions for the test management area, ATM stands out immediately and becomes a valuable alternative for modern testing teams in terms of not just design, but most importantly - data security. With Forge platform's ongoing development and constant evolution of the Atlassian ecosystem, ATM looks into the future with many growth opportunities on the horizon.

ATM is available now on the Atlassian Marketplace.

The screenshot shows the Jira Test Case Execution view for a test case titled "Successful Account Creation". The test case is assigned to Emma Paris, is of type V1, Manual, and is in the production environment. The test case progress is 100%, and it is marked as "PASS". The test steps are listed below:

Step	Action	Data	Expected Results	Actual Results
1	Enter a valid e-mail address	user@example.com	E-mail is accepted, no validation error is shown	All good, evidence: https://drive.google.com/drive/screenshot.com
2	Enter a valid password	Password123!	Password is accepted, meets the complexity requirements	

Below the screenshot, the text "Test Case Execution view with Appsvio Test Management" is displayed, followed by the Appsvio logo, which consists of a stylized pink triangle and the word "appsvio" in pink lowercase letters.
