

Fusion Meso Expands Presence in Singapore with New Professional-Grade Skin Vials

Now Available in Singapore at Casa Beauty Tampines/ Toa Payoh and Perfect Beauty Bedok

SINGAPORE, CENTRAL SINGAPORE, SINGAPORE, July 15, 2025 /EINPresswire.com/ -- Fusion Meso, a European leader in aesthetic medicine and professional skincare, announces the regional launch of Exosome 2.0, a new-generation vial formulation designed to meet the rising demand for intelligent, high-performance skin solutions. This event signals the brand's expanded footprint in Singapore and reaffirms its commitment to science-backed skin repair, rejuvenation, and regeneration.

The official launch will take place on Saturday, 8 November 2025, at Grand Hyatt Singapore, hosted by Fusion Meso founder and CEO Raphaël Duerinck. A chemist and biomedical engineer by training, Duerinck has over 20 years of experience in aesthetic product development, with a background in dermatology and biochemistry.

"Our mission with Fusion Meso has always been to merge science and aesthetics—to provide results that go beyond the surface," says Raphaël Duerinck. "With Exosome 2.0, we are challenging outdated skincare norms and raising the bar for clinical-grade results in non-invasive protocols."

Scientific Innovation: What Sets Exosome 2.0 Apart

Exosome 2.0 builds upon Fusion Meso's existing exosome technology and introduces a

proprietary method of encapsulation and preservation, improving molecular stability and delivery. Suitable for both needle-free and microneedling applications, this formula targets complex ageing signs by accelerating cellular renewal and improving skin resilience.

Exosomes—tiny extracellular vesicles naturally secreted by cells—have gained attention in recent years for their regenerative effects. Fusion Meso's laboratory-processed exosomes are derived from plant stem cells and combined with peptides, hyaluronic acid, and bioengineered actives to maximise clinical efficacy.

Expanding the Professional Range: From Skin to Hair and Body

Alongside Exosome 2.0, Fusion Meso will also showcase its expanded family of skin vials tailored for different conditions, including: - F-XFC+: for skin rejuvenation and elasticity - F-Hair & F-Hair Men: for hair loss treatment and scalp repair - F-Lift+ Face: for firming and contouring - F-Glow Ultra: for dull, fatigued skin - F-Mesomatrix: for skin barrier recovery and sensitive skin

These sterile, preservative-free vials are used in professional settings via microneedling, electroporation, or ultrasound infusion—offering an effective alternative to injectables.

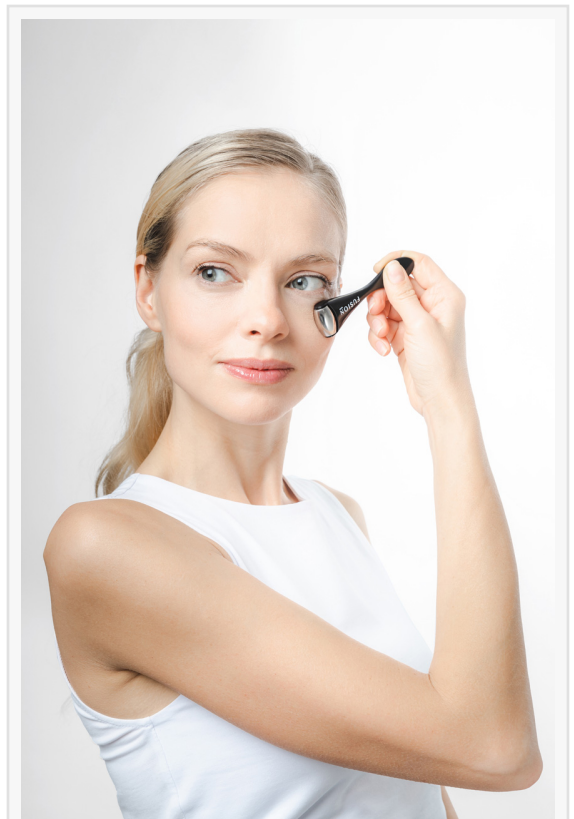

Available at Leading Skin Clinics in Singapore

“

Fusion Meso was created to bring real results through science. Every vial reflects our commitment to innovation, performance, and professional-grade skin health.”
