

Incinerator Market to Witness Substantial Growth by 2031 | Global Forecast & Opportunity Analysis

Incinerator Market to Witness Substantial Growth by 2031 | Global Forecast & Opportunity Analysis

NEW CASTLE, DE, UNITED STATES, July 14, 2025 /EINPresswire.com/ -- Allied Market Research published a report, titled, "[Incinerator Market](#) by Product Type (Rotary Kiln, Fluidized Bed, Liquid Injection, Others), by Operation (Controlled Air Incinerators, Excess Air Incinerators), by End User Industry (Municipal, Industrial): Global Opportunity Analysis and Industry Forecast, 2021-2031." According to the report, the global incinerator market industry generated \$14.8 billion in 2021, and is estimated to reach \$22.6 billion by 2031, witnessing a CAGR of 4.2% from 2022 to 2031. The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario.

Drivers and Opportunities

Rapid rise in hazardous and non-hazardous wastes due to the growing population and the increase in industrialization in emerging economies drive the growth of the global incinerator market. However, the high upfront cost of incinerators hamper the market growth. On the other hand, advancements in technology that enables operators to effectively collect CO₂ from the exhaust of incinerators offer lucrative growth opportunity for the market.

Covid-19 Scenario

The outbreak of the Covid-19 pandemic hampered the growth of the incinerator market, owing to restrictions on manufacturing activities. Moreover, incinerators could not be effectively installed in industries and municipal facilities through OEMs during the lockdown period. However, the medical sector prevented the market from taking a steep dive, and kept some demand alive. Moreover, owing to the introduction of various vaccines, the severity of COVID-19 pandemic significantly reduced.

By mid-2022, the number of COVID-19 cases came down significantly, leading to the reopening of incinerator manufacturing companies at their full-scale capacities. Furthermore, many companies already shown notable signs of recovery since the outbreak of this pandemic. The rotary kiln market segment to rule the roost during the forecast period

Based on product type, the rotary kin segment was the largest market in 2021, contributing to nearly half of the global incinerator market, and is expected to maintain its leadership status during the forecast period, owing to its cost effectiveness. However, the liquid injection segment is projected to witness the largest CAGR of 5.0% from 2022 to 2031, owing to its effectiveness in disposing aqueous and non-aqueous wastes.

The controlled air incinerators segment to maintain its dominance during the forecast period

Based on operation, the controlled air incinerators segment held the largest market share of nearly three-fifths of the global incinerator market in 2021, and is expected to maintain its dominance during the forecast period, owing to its extensive use in municipal and industrial applications. However, the excess air incinerators segment is projected to witness the largest CAGR of 4.5% from 2022 to 2031, owing to its cost effectiveness.

The municipal segment to maintain its dominance during the forecast period

Based on end user industry, the municipal segment held the largest market share of nearly 90% of the global incinerator market in 2021, and is expected to maintain its dominance during the forecast period, owing to the effectiveness of incinerators in solid waste disposal. However, the industrial segment is projected to witness the largest CAGR of 4.8% from 2022 to 2031. This is due to the increased demand for heat treatment in various manufacturing industries.

Asia-Pacific to dominate the market by 2031

Based on region, Asia-Pacific was the largest market in 2021, capturing around two-fifths of the global incinerator market, and is expected to lead the trail during the forecast period, owing to large waste generation in the region. However, LAMEA is projected to manifest the fastest CAGR of 5.2% during the forecast period, owing to the rapid growth of population in the region.

Leading Market Players

Eco Concepts

ACS Inc.

Alfa Therm

Atlas Incinerator ApS

Babcock and Wilcox Co.

ChuwaIndustrial Corporation

Dutch Incinerators

EEW Energy

Haat Incinerator India Pvt. Ltd.
Incinco Ltd.
Inciner8 Limited
Keller Manufacturing, Inc.
Ketek Group
Maximus Envirotech Pvt. Ltd.
Shandong Better Environmental Protection Technology Co., Ltd.
Vikas Incinerator
WasteSpectrum Incineration Systems

The report provides a detailed analysis of these key players of the global incinerator market. These players have adopted various strategies such as expansion, new product launches, partnerships, and others to increase their market penetration and strengthen their position in the industry. The report is helpful in determining the business performance, operating segments, product portfolio, and developments by every market player.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports Insights" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies, and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
