

# Watch The Rotary Sealer That's Helping CPG Brands Scale Smarter

DEKALB, IL, UNITED STATES, July 24, 2025 /EINPresswire.com/ -- In its latest product showcase, Aligus Packaging reveals the rotary sealing machine that's redefining flexibility and ease of use for the packaging industry. The powerful, operator-friendly system is helping CPG brands scale smarter with faster changeovers, minimal training requirements, and broad application flexibility.

Engineered and built at Aligus' DeKalb, IL headquarters, the rotary machine line offers a smarter, simpler approach to sealing automation. Its compact design, versatility, and intuitive controls make it the ideal solution for brands looking to boost throughput without overcomplicating their production line.

## A Smarter Path to Packaging Growth

The newly released video puts the spotlight on the machine's clean, efficient operation, designed specifically for brands that need flexibility and speed. From medical and personal care products to household goods, the rotary system adapts easily to different package styles and formats while maintaining consistent, high-quality seals.

"The Rotary Sealing Machine is a great example of how Aligus helps brands scale smarter...not just faster," says Rod MacNeille, CEO of Aligus Packaging. "It's about building machines that simplify packaging operations, reduce downtime, and fit seamlessly into existing processes. This video really shows what that looks like in action."

Designed for Simplicity, Built for Scale

With quick changeovers and compatibility with both custom and standard heat seal tooling, the rotary sealer is engineered for the realities of today's packaging environments: where speed, flexibility, and ease of use are more important than ever.

This latest video release continues Algus' mission to highlight practical, real-world solutions for manufacturers seeking greater efficiency. By demonstrating the machine in action, Algus invites packaging teams to reimagine what's possible with smart, scalable automation.

### About Algus Packaging

Algus Packaging is a leader in thermoformed packaging, heat seal tooling, and automated packaging machinery, engineering state-of-the-art solutions from concept to completion. With decades of expertise, Algus specializes in designing and building custom packaging and machinery that ensures the perfect fit, functionality, and shelf appeal. Committed to innovation, Algus partners with brands and retailers to push the boundaries of packaging design and technology.
