

HashJ Introduces New Cloud Mining Model for SOL and XRP Network Participation

NORFOLK, UNITED KINGDOM, July 15, 2025 /EINPresswire.com/ -- MGPD Finance Limited, [operating as hashj cloud mining](#), has [announced the launch](#) of a new infrastructure solution—Turbo-Yield Dual-Engine Cloud Lane—designed to facilitate efficient participation in the Solana and XRP networks through cloud-based hashing and staking infrastructure.

This development follows recent projections from independent research firms suggesting notable price targets for both SOL and XRP by year-end.

According to aggregated forecasts from CryptoVision, BlockSignals, and Galaxy Charts, SOL is anticipated to range between \$200–\$220, while XRP is forecasted at \$1.50–\$1.80. These projections have coincided with a marked rise in search interest, with “Solana price prediction” and “XRP yield” queries increasing by 260% and 190%, respectively, over the past 90 days (Google Trends, June 2025).

HashJ Introduces New Cloud Mining Model for SOL and XRP Network Participation

Technical Overview:

The Turbo-Yield Dual-Engine Cloud Lane model leverages an AI-powered scheduler to dynamically allocate hash power across select high-yield Solana validators and XRP consensus nodes. The system architecture is built on a renewable-energy foundation utilizing hydroelectric and solar-powered data centers. This design supports 24-hour reward cycles and aligns with ESG-focused operational standards.

Key Infrastructure Components:

1. AI Dual-Engine Scheduler - Routes computing power based on real-time yield performance metrics.
2. Renewable Backbone - Utilizes hydro and solar sources, reducing carbon output by up to

80%.

3. T+0 Daily Settlements - Offers daily liquidity on staking and mining proceeds.

4. Integrated DeFi Utility - Option to convert earned assets into stablecoins and allocate to external liquidity programs.

User Access and Roadmap:

The system is currently accessible in 96 countries, with over 9.3 million active participants and 8,000+ TH/s in aggregated hash capacity. [hashj cloud mining](#) reports a 99.99% uptime across global data centers and is planning additional product rollouts in Q4 2025, including a Solana liquid staking vault and XRP-based payment gateway integration.

About MGPD Finance Limited:

MGPD Finance Limited, operating as hashj cloud mining, provides cloud-based infrastructure services for blockchain network participation. Operating under the hashj cloud mining brand, the firm combines AI automation with renewable-energy-powered data centers to deliver accessible computing services for distributed ledger ecosystems, including those of SOL, XRP, BTC, ETH, and others.
