

RetiXol Launches in U.S., Offering Advanced Retinol Skincare Solution

RetiXol: Retinol redefined with precise dosing and plant-based support for youthful, radiant skin—without the irritation.

FRANKFURT AM MAIN, HESSEN,
GERMANY, July 16, 2025

/EINPresswire.com/ -- A new German-developed night cream formulated with precisely balanced retinol is entering the U.S. skincare market. [RetiXol](#), designed to address the challenges commonly associated with traditional retinol products, is now available online and at select pharmacies across the country.

Decades of research support retinol as an effective ingredient for reducing visible signs of aging, such as fine lines, wrinkles, and uneven skin tone. However, sensitivity, irritation, and dosage complexity have presented obstacles for many consumers seeking to benefit from retinol-based treatments.

RetiXol aims to overcome these challenges through a formulation that combines a standardized dose of pure retinol with plant-derived extracts intended to provide similar effects with improved skin compatibility. The product is free from parabens, silicones, and microplastics.

“

Retinol always irritated my skin. With RetiXol, it's soft, bright, and never irritated. The dose is perfect every time—I finally feel good in my skin again!”

Samantha L.

According to spokesperson Tobias Evertz, “RetiXol was developed in response to widespread feedback about retinol irritation and user confusion over dosage. The goal was to simplify retinol use while maintaining efficacy.”

Product Highlights:

- Designed to visibly reduce the appearance of wrinkles and fine lines
- Includes ingredients to support hydration and soothe sensitive skin
- Intended to promote even skin tone and reduce the look of dark spots
- Requires no manual dosage adjustments
- Formulated without parabens, silicones, or microplastics

RetiXol is intended for nightly application to the face, neck, and décolletage following cleansing. Users are advised to apply sunscreen during the day while using retinol-containing products.

The launch of RetiXol follows positive feedback from early users in Germany and recent pilot programs in select U.S. markets.

RetiXol is now available at www.retixol.com and participating pharmacies nationwide.
