North America is the market leaders and accounted for 40% share of the global market in 2017, followed by Europe in geographical segment. In addition, Asia-Pacific is estimated to grow at the highest CAGR as projected to be 11.4% during the forecast period. The market is increasing in developing economies of Asia-Pacific mainly because of the need of an economical alternative to direct purchasing each time, gradual increase in social acceptance of rental clothes, and overall increase in sales in online clothing industry. Fashion-conscious individuals that lacks the financial resources to purchase the clothing of their choice are expected to make most use of online clothing rental services. Rental services are proved to be a cost-effective option for these end users especially women, who are also thriving on the growth showed in the global online clothing rental market.

The primary driver of the global online clothing rental market is the increase in ease of use of online retail. Moreover, rapid advancement observed in internet penetration, growing popularity of online shopping portals over the last decade as boost the market. The advancement in mobile internet technology has further driven the demand for online rental by making the process even more convenient. Furthermore, increased e-commerce market within Asia-Pacific also aid the high market growth rate. E-commerce channels are expected to gain popularity in online rental market in the near future with some restraints such as unregulated market, specific rental

policies, less social acceptance and knowledge of the platforms among population.
