COVID-19 scenario:

The COVID-19 pandemic hampered the financial sector and created extra risk aversions as venture capital investment activities reduced across the globe.

Small and medium business halted, and most businesses liquidated during the pandemic due to halt in manufacturing, disrupted supply chain, challenges in procurement, and lack of workforce.

Financial performance of assets of SMEs hampered due to valuation deduction in portfolio, challenges in existing investments, and foreign exchange volatility.

The report segments the global venture capital investment market on the basis of funding type, fund size, industry vertical, and region. Based on funding type, the follow-on venture funding segment is expected to portray the highest CAGR of 24.4% during the forecast period. However, the first-time venture funding segment held the largest share in 2021, contributing to around three-fourths of the market.

On the basis of fund size, the above \$1 billion segment is projected to showcase the highest CAGR of 23.8% during the forecast period. However, the under \$50 million segment held the lion's share in 2021, accounting for more than one-fourth of the market.

Based on industry vertical, the computer and consumer electronics segment held the largest share in 2021, accounting for more than one-fourth of the market. However, the energy segment is projected to register the highest CAGR of 22.7% during the forecast period.

The global venture capital investment market is analyzed across several regions such as North America, Europe, Asia-Pacific, and LAMEA. The market across North America dominated in 2021, holding nearly two-fourths of the market. However, the market across Asia-Pacific is projected to showcase the highest CAGR of 22.9% during the forecast period.
