

Drummer Launches Innovative AI Music Project 'ITCHIN SYNC' with Debut EP Set for Global Release July 31st

Drummer Of Over 45 Years Pioneers Electronic Pop & HipHop Experimental Sound Through Artificial Intelligence

TORONTO, ONTARIO, CANADA, July 17, 2025 /EINPresswire.com/ -- Ian Barnes, a seasoned drummer with 45 years of musical experience, announces the worldwide release of his groundbreaking AI music project [ITCHIN SYNC](#)'s debut EP, scheduled for July 31st, 2025. This latest venture represents Barnes' bold exploration into artificial intelligence-driven music creation, following the creation of his first AI music artist, [NEURO SCENE](#).

ITCHIN SYNC delivers an innovative fusion of Electronic Pop and HipHop through experimental soundscapes that push the boundaries of contemporary music production. The debut EP showcases Barnes' ability to blend cutting-edge technology with decades of musical expertise, creating a unique sonic experience that bridges traditional musicianship with artificial intelligence capabilities.

"After 45 years behind the kit, I've witnessed countless musical revolutions," said Barnes. "The integration of AI into music creation represents the most exciting frontier I've encountered. ITCHIN SYNC allows me to explore sounds and compositions that would be extraordinarily hard through traditional methods alone."

“

These are exciting new times for music, so get ready!"

Ian Barnes

Barnes' musical journey began at age 10, deeply rooted in the rich tapestry of popular music spanning multiple

Ian Barnes - Drummer

decades. His artistic foundation was built upon the driving rhythms of 60s and 70s Classic Rock, the infectious grooves of 70s Disco, the synthesized landscapes of 80s Pop, and the raw energy of 90s Grunge. This diverse musical palette eventually evolved to embrace electronic style pop, positioning Barnes perfectly for his current AI-driven ventures.

The Canadian musician's first AI project, NEURO SCENE, has already been distributed via Landr distribution service and is currently available to stream. With two EPs and one single currently available across all major streaming platforms, NEURO SCENE has demonstrated Barnes' successful transition from traditional drumming to AI-assisted composition and production.

ITCHIN SYNC represents an evolution in Barnes' artistic vision, incorporating more experimental elements while maintaining accessibility through its Electronic Pop and HipHop influences. The project exemplifies how veteran musicians can embrace emerging technologies to expand their creative horizons and reach new audiences.

"The beauty of working with AI is that it challenges everything I thought I knew about music creation," Barnes explained. "It's not about replacing human creativity – it's about amplifying it. The AI becomes another instrument in my arsenal, one that can generate ideas I never would have conceived on my own."

The upcoming EP release positions Barnes at the forefront of a growing movement of established musicians exploring artificial intelligence as a creative tool. His background as a drummer provides a unique rhythmic foundation that influences how he approaches AI-generated compositions, ensuring that the human element remains central to the creative process.

Barnes' extensive musical background spans genres that have defined popular music for over five decades. His ability to draw from Classic Rock's power, Disco's groove, Pop's accessibility, Grunge's authenticity, and electronic music's innovation creates a distinctive approach to AI music creation that sets his projects apart in an increasingly crowded digital landscape.

The global release strategy for ITCHIN SYNC's debut EP reflects the borderless nature of digital music consumption and the universal appeal of innovative sound design. The project is expected to attract attention from electronic music enthusiasts, HipHop fans, and those curious about the intersection of artificial intelligence and musical creativity.

As the music industry continues to evolve with technological advancement, Barnes represents a bridge between traditional musicianship and future possibilities. His willingness to embrace AI while maintaining his identity as a drummer and composer offers a model for other veteran musicians considering similar creative exploration.

The ITCHIN SYNC debut EP will be available on all major streaming platforms beginning July 31st, 2025. NEURO SCENE's existing catalog remains accessible across the same platforms, providing

listeners with a comprehensive view of Barnes' AI music journey.
