

InnoSaaS Launches Fotel AI, Unifying the Interaction of All AI

SHERIDAN, WY, UNITED STATES, July 17, 2025 /EINPresswire.com/ -- In June 2025, InnoSaaS Corp proudly unveiled [Fotel AI](https://fotel.ai) (website: <https://fotel.ai>), a groundbreaking platform that integrates hundreds of cutting-edge AI models through a unified user interface (UI), delivering a versatile AI solution for every industry. This platform significantly lowers the barrier to adopting new AI technologies, enabling users to seamlessly switch and access multiple AI functionalities within a single window.

Fotel AI Landing Page

Fotel AI incorporates advanced technologies, including [image generation and editing AI](#) (such as Flux), [video generation](#) (like Google Veo3), 3D asset creation, music generation, and the latest large language models (such as Grok4). Its unified UI allows users to effortlessly call and switch between AIs without navigating multiple web pages. For instance, after generating an image, users can simply input “@klings-v2.1” to leverage Kling’s video generation technology to create a video based on that image.

Addressing the inspiration behind Fotel AI, Saihold Zhao, Founder and CEO of InnoSaaS, stated: “We’re in an era of explosive AI innovation, with new products emerging daily. However, users often face the challenge of subscribing to multiple platforms and learning their unique interfaces. Fotel AI simplifies this by unifying all AI interactions into an intuitive, chat-like experience. By integrating a wide range of AI models, users no longer need multiple subscriptions or to switch between websites to meet their diverse needs.”

Fotel AI not only delivers a seamless AI experience but also aims to democratize and innovate artificial intelligence, serving as a bridge between users and future technologies. Visit <https://fotel.ai> now to explore the endless possibilities of AI!
