

Eridan's Douglas Kirkpatrick Appointed to FCC'S Technological Advisory Council

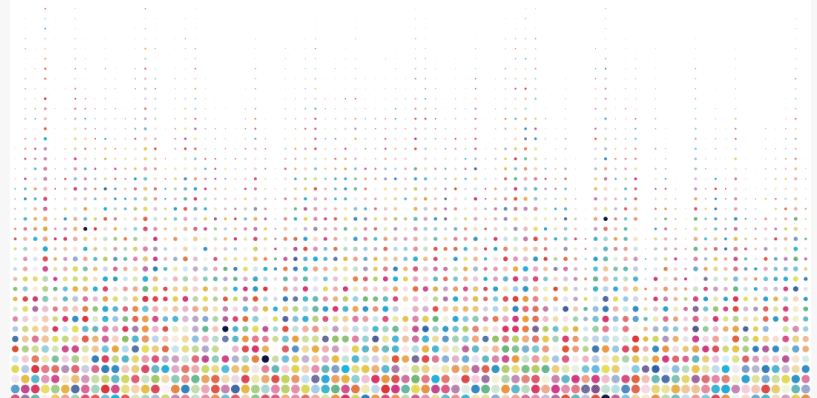

Eridan, developer of high-performance wireless radios, announced that its Co-Founder & CTO has been appointed to the FCC's Technological Advisory Council.

SUNNYVALE, CA, UNITED STATES, July 17, 2025 /EINPresswire.com/ -- Eridan, a company developing high-performance, energy-efficient wireless radios and technology, announced today that Co-Founder and Chief Technology Officer Doug Kirkpatrick has been appointed to the Federal Communications Commission's (FCC) Technological Advisory Council (TAC).

The TAC brings together leaders from across the tech and telecom sectors to advise the FCC on emerging technologies that influence wireless infrastructure, spectrum policy, and national connectivity goals.

His appointment comes at a time when the FCC is exploring new ways to improve spectrum efficiency and expand access. His role on the FCC's TAC reflects Eridan's broader mission: delivering radios that offer Ultra- Clean Signal performance with dramatically lower power consumption.

Kirkpatrick stated, "It's an honor to support the FCC's Technological Advisory Council. As we rethink how wireless systems are built and deployed, smart policy plays a critical role. At Eridan, we've worked to improve signal clarity and power efficiency not just as technical achievements, but as ways to expand access, make better use of spectrum, and enable more flexible infrastructure. I'm looking forward to contributing to the Council's efforts."

The Eridan logo features the word "ERIDAN" in a bold, dark blue, sans-serif font. The letter "I" is replaced by a stylized blue icon consisting of two curved shapes meeting at a point, resembling a signal or a stylized 'E'.A decorative graphic consisting of a dense grid of small, multi-colored dots in various colors including red, blue, green, yellow, and purple, arranged in a pattern that tapers towards the top.
