

# Royal Cyber to Host Premier Tech Event in Riyadh: 'Agentic AI & Cloud Modernization – Accelerating Innovation in KSA'

*Explore how Agentic AI and AWS-powered cloud modernization are accelerating enterprise innovation in Saudi Arabia—live in Riyadh on July 30.*

RIYADH, RIYADH PROVINCE, SAUDI ARABIA, July 21, 2025

/EINPresswire.com/ -- As Saudi Arabia advances toward its Vision 2030 goals, the Kingdom is rapidly emerging as a regional innovation hub. At the heart of this transformation is the urgent need for intelligent, scalable, and future-ready technology infrastructure. In response, Royal Cyber, in collaboration with Amazon Web Services ([AWS](#)), is set to host a high-impact, in-person event:

“Agentic AI & Cloud Modernization – Accelerating Innovation in KSA” on July 30, 2025, at the Marriott Courtyard Olaya, Riyadh.

“

This event is about execution—not speculation,” added . “We’re showcasing proven strategies and technologies that are already delivering measurable impact for Saudi enterprises.”

*Faaz Malik Iqbal*

This exclusive, invitation-only gathering brings together senior technology leaders, AWS experts, and enterprise decision-makers to explore how autonomous AI [agents](#) and cloud-native modernization are driving real-world transformation across Saudi enterprises.

---

SA Aligning with Vision 2030

Saudi Arabia’s Vision 2030 initiative aims to diversify the economy through innovation, technology, and digital

empowerment. Artificial intelligence and cloud infrastructure have been identified as critical enablers of this vision — powering everything from smart cities to predictive healthcare and

intelligent logistics.

“As Saudi enterprises embrace digital-first mandates, the shift to autonomous systems and cloud-native platforms is no longer optional—it’s essential,” said Faaz Malik Iqbal, General Manager at Royal Cyber. “This event will demonstrate how to turn that vision into reality using real-world strategies and AWS technologies.”

---

□ The Business Landscape Is Changing — Fast  
Enterprises across KSA are under pressure to:

- Modernize aging infrastructure
- Respond faster to shifting customer and market demands
- Integrate next-generation AI capabilities

Traditional digital strategies are no longer sufficient. Organizations must move beyond basic automation toward intelligent, adaptive, and autonomous systems — without disrupting mission-critical operations.

“We’re seeing a shift from bots to true autonomy,” said Sampda S, Innovation Specialist at Royal Cyber. “This event will explore how businesses in KSA can lead this evolution with confidence and clarity.”

---

What Is Agentic AI?

Agentic AI refers to autonomous AI agents that can perceive, decide, act, and learn — often in coordination with other agents — to solve complex business problems. Unlike simple bots or scripts, agentic systems are capable of reasoning, orchestrating workflows, and adapting in real time.

Paired with cloud-native modernization, agentic AI enables enterprises to build intelligent, flexible, and scalable ecosystems ready for the next decade.

---

Accelerating Cloud-First Innovation with AWS

A key highlight of the event will be AWS Transform, an enterprise-grade framework that helps businesses migrate and modernize legacy systems securely and efficiently in the cloud. Royal Cyber, an AWS Advanced Consulting Partner, brings deep experience in cloud strategy, migration, and DevOps — guiding enterprises through every step of their modernization journey.

---

Event Agenda – July 30, 2025, | 7:30 PM – 8:30 PM (KSA Time)

Location: Marriott Courtyard Olaya, Riyadh | Format: In-Person | Invitation-Only

- Vision Talk: Dual Transformation, Agentic AI & Modernization
  - AWS Keynote: Cloud-Native Modernization for AI Workflows
  - Session: Accelerating Migration with AWS Transform
  - Tech Talk: From Bots to Agents: Architecting Autonomy
  - Live Demo: Multi-Agent Orchestration in Action
  - Closing Remarks & Q/A
  - Networking & Refreshments
- 

#### □ Featured Speakers

- Faaz Malik Iqbal – General Manager, Royal Cyber
- Faisal Usman – Cloud Practice Lead, Royal Cyber
- Sampda S – Innovation Specialist, Royal Cyber
- Haseeb Abdul – Senior Solution Architect – Cloud, Royal Cyber

These speakers bring hands-on experience in executing large-scale AI and cloud initiatives across industries such as banking, retail, healthcare, and government.

---

#### □ Who Should Attend

This event is tailored for:

- CIOs & CTOs
  - Heads of IT and Infrastructure
  - Enterprise Architects
  - Innovation & Transformation Leaders
  - AI and Cloud Strategists
  - Government and Public Sector Technologists
- 

#### □ Why Attend

- Gain first-hand insights from AWS and Royal Cyber experts
- Explore real-world Agentic AI use cases in enterprise settings
- Discover how AWS Transform simplifies and accelerates modernization
- Network with top tech leaders and innovation pioneers in KSA

---

□ RSVP Now

Attendance is limited. Reserve your spot to join Royal Cyber, AWS, and KSA's most forward-thinking technology leaders.
