

# Trucent Expands Operations with New Facility Near Saltillo, Mexico

DEXTER, MI, UNITED STATES, July 22, 2025 /EINPresswire.com/ -- [Trucent](#), a leading provider of [fluid separation and purification technologies](#), has announced the relocation of its Mexico operations from Monterrey to a new, larger facility in Arteaga, just outside Saltillo. This strategic move—to an established hub for manufacturing and industry—supports the company's rapid growth and expanding customer base throughout the region.

The 1,000-square-meter facility includes expanded office space, a state-of-the-art analytical laboratory, a fully equipped service bay, and multi-level shipping docks designed to support Trucent's advanced separation technologies. The enhanced space enables faster response times, greater technical capabilities, and improved service throughout Mexico.

“

Trucent believes clean fluids work better, last longer, and save money. This investment in Saltillo strengthens our infrastructure and our long-term commitment to supporting customers across Mexico.”

*Mike Smolen*

Trucent Mexico now operates from this Arteaga facility, featuring expanded office, lab, and service space.

Trucent Mexico has significantly expanded its footprint over the past four years, driven by strong regional demand and consistent year-over-year growth.

“With a 300% growth in our services during the past four years, Trucent needed a larger facility and expanded laboratory capabilities to support the significant increase of customers in this region,” said Luis Zamora, Trucent Mexico Business and Operations Manager.

The new location in the Saltillo/Arteaga region places Trucent at the heart of one of Mexico's fastest-growing industrial corridors. Known for its concentration of

automotive and manufacturing operations—including major OEMs and Tier 1 suppliers—the area offers a strong logistics network and access to a skilled technical workforce. This positions Trucent to provide faster, more responsive support to its expanding customer base.

Under the leadership of Director Mike Smolen, the Mexico operation has become a vital hub for delivering fluid performance solutions to manufacturers and industrial partners. Trucent's mission—to help customers improve uptime, reduce waste, and lower fluid-related costs—drives every aspect of its work in the region.

Trucent Mexico's team of fluid management and service professionals at the Arteaga facility.

"At Trucent, we believe [clean fluids work better, last longer, and save money](#)," said Smolen. "This investment in Saltillo strengthens our infrastructure and reflects our long-term commitment to supporting customers throughout Mexico."

Trucent provides integrated fluid filtration, separation, and purification solutions across a wide range of industries, with technologies and service teams operating throughout North America.
