

RefillGenie Provides Critical Medication Access as Millions Face Medicaid Coverage Loss

Telehealth platform offers affordable medication refills to address the healthcare access crisis affecting millions losing Medicaid benefits.

JERSEY CITY, NJ, UNITED STATES, July 22,

2025 /EINPresswire.com/ -- As millions of Americans prepare to lose Medicaid coverage due to federal budget proposals, [RefillGenie](#), a physician-founded telehealth company, is positioning itself as a crucial safety net for patients who will lose access to prescription medications. The New Jersey-based platform provides medication refills without insurance requirements, addressing what healthcare experts predict will be a significant public health crisis.

The impending reduction in Medicaid eligibility threatens to leave millions of Americans without access to essential medications for chronic conditions, including diabetes, hypertension, depression, and anxiety. For patients managing these conditions, an interruption in medication access can lead to serious health complications, emergency room visits, and preventable hospitalizations.

Dr. Stephen Kelly, an emergency physician and founder of RefillGenie, developed the service after witnessing patients suffer preventable complications from conditions like diabetes and hypertension when they couldn't access medication refills. "We've seen firsthand what happens when patients can't afford their medication," said Dr. Kelly. "You shouldn't have to visit an ER just to get your blood pressure meds refilled."

RefillGenie operates as a text-based service across 47 states, providing medication refills within hours through an online process accessible via phone or laptop. The platform allows patients to refill up to three existing medications for \$29.99 without requiring appointments or insurance verification.

The service focuses on common chronic medications, including SSRIs, blood pressure medications, and asthma inhalers, while maintaining safety protocols by excluding controlled substances and medications requiring close monitoring. When necessary, the company provides lab orders and interpretation at no additional charge.

Patient feedback illustrates the platform's role in addressing medication access barriers. Stephanie G. reported, "Excellent service. I was able to get my prescription within 12 hours. Very convenient, good price, great option if you don't have insurance or can't get an appointment with your Dr."

Ashlie K. described her experience: "This was my first time using RefillGenie and it was the best experience ever. I was stressed because my Dr. Has me on meds but makes me jump through hoops for refills. I had been out for a few days and was feeling horrible. When I found RefillGenie it was 2pm. I filled out the paperwork, sent in the required Info and by 5pm my pharmacy was calling me telling me I had meds ready for pickup."

The platform operates continuously with standard turnaround times of 12 hours, though most refills are processed significantly faster. RefillGenie maintains patient safety as a priority, sometimes requiring bloodwork before providing refills and ensuring appropriate medical oversight for chronic condition management.

The company serves as a temporary resource to bridge gaps in care during transitions between healthcare providers or insurance coverage while encouraging patients to re-establish care with local providers for comprehensive health management.

RefillGenie's expansion addresses mounting healthcare accessibility challenges across the United States, particularly affecting patients managing chronic conditions who depend on consistent medication access to prevent serious complications. The service targets individuals who struggle to maintain healthcare access due to scheduling difficulties, insurance gaps, or geographic barriers.

As healthcare policy changes affect millions of Americans' access to care, platforms like RefillGenie represent emerging solutions to maintain medication continuity during periods of coverage uncertainty.

###

About RefillGenie Inc.

The physician founders of RefillGenie (<https://refillgenie.com/about-us/>) were tired of seeing patients suffer from strokes and heart attacks simply because they were unable to refill their blood pressure medication. For that reason, they created a simple, text-based service to ensure anyone can access their life-saving medications, even when in-between doctors or insurance plans.

Note to Editors

RefillGenie is a telehealth company that provides medication refill services to patients in 47 states across the USA.

The company was founded by Dr. Stephen Kelly and is headquartered in Jersey City, New Jersey.

RefillGenie's mission is to remove barriers to medication access and ensure patients can easily manage their health, even during times of uncertainty or transition.

The company offers a user-friendly, text-based service with transparent pricing and direct communication with licensed physicians.

RefillGenie does not intend to replace primary care doctors. It serves as a temporary resource to bridge gaps in care and prevent complications from conditions like diabetes and hypertension.
