

# Royal Cyber to Showcase AI-Powered Mainframe Modernization at SHARE 2025 in Cleveland

*Join Royal Cyber at SHARE 2025 to see how GenAI and WatsonX drive faster mainframe modernization through real-world use cases and expert insights.*

CLEVELAND, OH, UNITED STATES, July 23, 2025 /EINPresswire.com/ -- [Royal Cyber](#), a leading enterprise modernization and AI transformation partner, is excited to announce its participation at SHARE 2025, taking place August 17–21 at the Hilton

Cleveland Downtown. As a trusted innovator in [mainframe](#)-to-cloud migration, generative AI, and automation, Royal Cyber will be exhibiting at Booth #204 and presenting expert-led sessions that spotlight real-world modernization success..

“

IBM WatsonX has unlocked a new era of mainframe automation,” . “Our session will highlight tools and results that every modernization leader needs to see.”

*said Syed Basheer, Senior Vice President at Royal Cyber*

## Leading the Shift from Legacy to Intelligent Infrastructure

Royal Cyber, a global leader in enterprise modernization and AI-powered transformation, is helping global enterprises transform legacy systems using generative AI, IBM [WatsonX](#), and intelligent automation.

As mission-critical workloads continue to rely on mainframes, enterprises face growing pressure to modernize without disrupting business. Royal Cyber’s AI-

driven approach provides a proven blueprint to reduce complexity, minimize risk, and accelerate ROI.

## Royal Cyber's Mainframe Modernization Expertise

With over two decades of modernization experience, Royal Cyber specializes in transforming legacy mainframe systems into agile, cloud-integrated environments.

From COBOL refactoring and database replatforming to AI-powered automation and API enablement, Royal Cyber helps enterprises across banking, insurance, and retail achieve faster, safer, and more cost-effective modernization—without compromising on business continuity.

---

### Expert Sessions at SHARE 2025

Royal Cyber will deliver two featured speaking sessions focused on real-world AI and automation use cases:
