

# Medvin Health Launches a Support Model to Help International Doctors Thrive Abroad

CASPER, WY, UNITED STATES, July 24, 2025 /EINPresswire.com/ -- Medvin Health has announced the launch of its end-to-end support model to guide international medical graduates (IMGs) through every stage of their international career transition. The model aims to address the clinician shortages straining healthcare systems worldwide while helping IMGs navigate through the administrative hurdles.

Founded by Dr Gokul Ram in 2023, Medvin Health has already empowered over 1,000 doctors across Asia, the Gulf, Australia, the UK, and other regions worldwide. Medvin Health offers a comprehensive, structured pathway designed to guide international doctors through every stage of their global career journey. From licensing and registration to job application strategy, interview preparation, relocation planning, and long-term career growth, doctors receive expert-led, personalized guidance at every step.

“We meet so many brilliant doctors who are stuck, not because they aren’t capable but because they don’t know where to start or what comes next,” explains Dr Ram. “That’s why we built a system that walks with them from day one, not merely to land a job but to shape a fulfilling career abroad.”

The model begins with a personalised roadmap, mapping out the ideal registration pathway to Australia, the UK or New Zealand.

Medvin Health goes beyond just paperwork or coaching. The team provides end-to-end guidance, helping doctors craft strong CVs, prepare for competitive interviews, understand

licensing systems such as AHPRA, GMC and MCNZ, and confidently navigate job opportunities that align with their career goals.

Praising the team's candid feedback and strategic career coaching, Dr. Patel, one of many satisfied Medvin Health's clients, said, "Medvin Health made the entire process seamless and stress-free. Their guidance helped me secure my first paediatric role in Australia and navigate the application process with ease. I'm incredibly grateful for their support, which made my dream of practising in Australia a reality."

Medvin Health reports a high client satisfaction rate and a track record for effective job application guidance. Many doctors have benefited from Medvin Health's expert support and range of services.

"Medvin Health is not just building careers," adds Dr. Ram. "We're strengthening healthcare systems by helping qualified professionals deliver care where it's needed most."

Medvin Health's commitment goes beyond career development. Later this year, the company will launch an elearning platform featuring on-demand masterclasses. This digital hub will offer peer forums, resource libraries and live expert Q&A sessions, empowering international medical graduates (IMGs) to continue growing well beyond their initial transition into international healthcare systems.

"Our goal is a lifelong partnership," Dr Ram states. "We want IMGs to thrive at every stage of their career, to become leaders in their new communities and to advocate for quality care worldwide."
