## COVID-19 Scenario:

The outbreak of the COVID-19 has had a negative impact on the growth of the global intelligent pump market, owing to the occurrence of lockdowns in various countries across the globe. Lockdowns resulted in the prevalence of various restrictions on manufacturing facilities, including those of intelligent pumps.

The COVID-19 pandemic halted the production of many intelligent pump's provider due to lockdown. The economic slowdown initially resulted in reduced production in end-user industries.

In addition, reduction in skilled workforce and shortage of raw materials due to strict ban on import and export of necessary items further aggravated the impact on the market. These restrictions are imposed by the government so as to curb the spread of the virus during the pandemic.

However, owing to the introduction of various vaccines, the severity of the COVID-19 pandemic has significantly reduced.

The report offers detailed segmentation of the global intelligent pump market based on type, component, end-user industry, and region.

Based on type, the centrifugal segment held the largest market share in 2021, holding more than two-thirds of the global intelligent pump market share, and is expected to maintain its leadership status during the forecast period. In addition, the same segment is expected to cite the fastest CAGR of 7.4% during the forecast period. The report also analyses other segment such as the positive displacement segment.
