PubHive Launches AI-Insight: A Next-Gen Generative AI for Medical Affairs, Clinical, and Medical Device Teams

PubHive launches AI-Insight to streamline literature reviews with fast, structured insights for Medical, Clinical, HEOR & Device teams.

LONDON, UNITED KINGDOM, July 24, 2025 /EINPresswire.com/ -- PubHive, the award-winning AI-powered SaaS platform for literature and safety information management, announces the launch of AI-Insight—a next-generation generative AI solution built to streamline how biomedical and medical device teams extract and utilize scientific insights.

PubHive Launches AI-Insight for Efficient Literature Review

Designed to meet the needs of [Medical Affairs](), [Clinical Affairs](), [HEOR](), and Medical Device teams, AI-Insight delivers fast, structured, and context-rich outputs that enhance scientific decision-making, reduce manual workloads, and ensure regulatory compliance.

 Built for Specialized Workflows

> AI-Insight is a game-changer for teams overwhelmed by the growing volume and complexity of biomedical literature"
>
> *Raj Vaghela*

AI-Insight accelerates the review of large volumes of peer-reviewed research, clinical studies, and medical device documentation. It delivers tailored, high-value insights to teams across:

Medical Affairs – enabling effective scientific communication

Clinical Affairs – surfacing study designs, outcomes, and safety signals

HEOR – supporting outcomes modeling and economic analyses

Medical Devices – aiding CER, PMCF, and global regulatory reporting

Library & KM Teams – improving literature discoverability and curation

Publication Planning Teams – streamlining access to publication-ready data

 What AI-Insight Extracts
From study objectives and endpoints to safety profiles, statistical methods, and funding details, AI-Insight automatically pulls out and organizes the most critical information - turning thousands of pages into decision-ready insights.

With seamless integration and high-precision extraction, AI-Insight empowers life sciences teams to transform literature review from a burden into a competitive advantage.
