

Avere Beauty Introduces Deka Toro Laser for Efficient Tattoo Removal in Pittsburgh

Pittsburgh-based med spa now introduces enhanced laser tattoo removal technology with the Deka Toro system.

PITTSBURGH, PA, UNITED STATES, July 24, 2025 /EINPresswire.com/ -- [Avere Beauty](#), a leading medical spa serving the Pittsburgh metropolitan area, has introduced the [Deka Toro laser system to enhance its tattoo removal services](#).

The addition addresses increasing demand from individuals seeking professional tattoo removal solutions across western Pennsylvania.

The Deka Toro represents advanced laser technology specifically designed for tattoo removal treatments. According to the company, the system effectively targets tattoos of all colors, including challenging shades such as blue, green, and red that traditionally require specialized treatment approaches.

"We recognized the growing need for effective tattoo removal solutions in our community," said Frank Udavcak, Business Director at Avere Beauty. "The Deka Toro laser allows us to provide our clients with enhanced comfort and superior efficiency compared to traditional methods."

Avere Beauty reports that people seek tattoo removal for various reasons, including changes in personal taste, professional requirements, preparation for new tattoo designs, and life transitions. The company's approach focuses on providing compassionate and professional treatment tailored to individual client needs.

The Deka Toro system features integrated cooling technology and precision laser delivery designed to minimize discomfort during treatment sessions. The company states that most clients describe the sensation as minimal discomfort, similar to quick snaps against the skin, with topical anesthetics available for additional comfort when needed.

Treatment protocols typically require between four to ten sessions depending on factors

including tattoo color, size, ink type, and individual skin characteristics. The laser technology works by penetrating the skin to target tattoo pigment, breaking down ink particles into fragments that the body's natural healing processes eliminate over time.

Avere Beauty offers both single session pricing and unlimited removal packages. The unlimited package provides treatments until complete tattoo removal is achieved, regardless of the number of sessions required. Flexible financing options are available to make treatments accessible to clients.

Client testimonials reflect positive experiences with the facility's services. "I absolutely love this place! Everyone is super friendly, super knowledgeable. I've had services done by Caitlyn, Ravyn and Lindsey and they've all been fabulous. They take the time to explain everything, answer all my questions, and tailor the treatment specifically to my needs. The results are natural, refreshed, and exactly what I was hoping for," said Tammy F., an Avere Beauty client.

Nina K., another client, shared her experience: "I had Ravyn for my appointment she did amazing! It was my first time getting anything done and she was so sweet. I love my results and couldn't be happier ☺"

Kadejrah H. noted the welcoming environment: "Love Avere ! Very welcoming staff when you arrive. Made me feel comfortable. Alyssa understood exactly what I was asking for! My results are amazing!"

The medical spa serves beauty and wellness enthusiasts within a 30-mile radius of Pittsburgh, including communities such as Cranberry, Fox Chapel, Mt. Lebanon, Sewickley, Murrysville, Squirrel Hill, Moon, Upper St Clair, Wexford, and Greensburg throughout Allegheny County.

Avere Beauty operates two locations: the Lawrenceville Med Spa at 3453 Butler Street, Pittsburgh, PA 15201, and the Murrysville Med Spa at 5100 Old William Penn Highway, Export, PA 15632. Both facilities provide the full range of tattoo removal services using the new Deka Toro technology.

The company's team includes certified technicians and medical professionals with backgrounds in critical care nursing, aesthetics, and specialized injection techniques. The staff focuses on creating a comfortable environment that differs from traditional clinical settings while maintaining professional medical standards.

According to industry data, the tattoo removal market continues to expand as societal attitudes toward body art evolve and professional requirements change. Advanced laser technologies like the Deka Toro provide more effective treatment options with reduced session requirements compared to earlier generation systems.

Avere Beauty emphasizes customized treatment plans that account for individual tattoo

characteristics and client skin types. The personalized approach aims to optimize treatment outcomes while ensuring client comfort throughout the removal process.

For individuals considering tattoo removal services, consultations are available to assess specific treatment needs and develop appropriate removal strategies. The facility provides comprehensive information about the process, expected timelines, and associated costs during initial consultations.
