

Spartan Forge Launches Boldest Update Yet

Spartan Forge expands UAV mapping to boost visibility for hunters & support emergency personnel with cutting-edge, real time terrain & situational awareness.

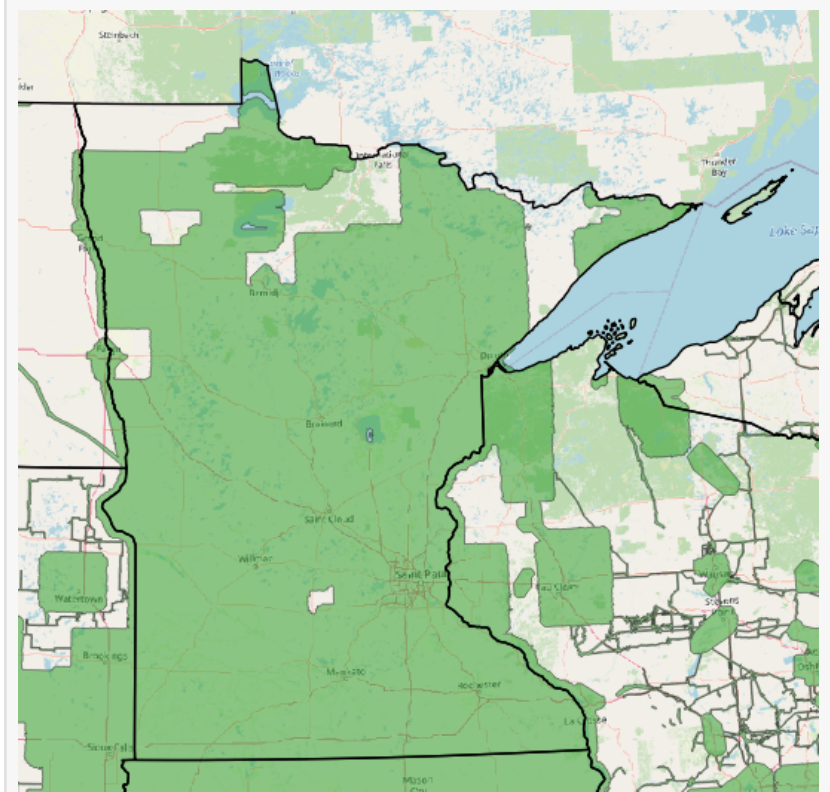

MN, UNITED STATES, July 24, 2025 /EINPresswire.com/ -- [Spartan Forge](#), the AI-powered [mapping](#) platform built by a former U.S. Army Intelligence Officer, has officially launched its most ambitious update to date. This release redefines terrain intelligence for hunters, landowners, and outdoor professionals with major [UAV](#) mapping expansion and strategic visibility improvements - including across the vast and varied landscapes of Minnesota.

The update includes 3x more UAV-derived aerial coverage across the U.S., delivering sharper resolution and deeper terrain clarity in critical outdoor regions like Minnesota, Pennsylvania, and beyond. This is the highest resolution aerial imagery available to the public, with full imagery coverage in most Whitetail states and newly unlocked historical data, users now gain access to both precision mapping and decades of landscape change.

In addition to serving hunters and land managers, Spartan Forge has actively supported emergency response and humanitarian efforts, deploying its mapping technology to assist organizations involved in natural disaster relief, veteran support missions, and search-and-rescue operations. The company remains committed to turning data into actionable intelligence when every second counts - providing its technology and resources to emergency personnel and law enforcement.

Now Live - What the Update Includes :

Historical Imagery Unlocked

New UAV imagery update enhances aerial coverage and terrain detail, giving users across the Minnesota region unmatched visibility and planning power.

This update is about unlocking knowledge - past, present & future. We built this platform to empower decisions in the field, for hunting, conservation, or emergencies.”

Bill Thompson

A 5-10x increase in Historical Imagery, view terrain changes dating back to 2015. This feature supports habitat monitoring, land planning, and forensic environmental analysis.

UAV Mapping Expansion

A 3x increase in aerial data coverage, including 100% imagery saturation in most Whitetail states and enhanced visibility in Minnesota and other underserved regions.

Utility Beyond the Hunt

Spartan Forge now serves a broad audience - from biologists and ranchers to first responders and public land agencies - transforming how wild spaces are studied and managed.

Available Now on All Platforms

The update is fully live on both mobile and desktop platforms, offering users a seamless and immersive mapping experience wherever they are.

Whether you're charting high-altitude search routes, analyzing decades of land use, or planning a hunt with precision, Spartan Forge gives you the most comprehensive view of the landscape - past, present, and in real time.

Experience the new Spartan Forge now at : www.spartanforge.ai .

About Spartan Forge

Built by a former U.S. Army Intelligence Officer, Spartan Forge fuses military-grade data science with deep field experience to create the most advanced AI mapping platform on the market. Originally developed for hunters, the platform now powers decisions for professionals across land management, emergency response, conservation, and outdoor recreation - delivering insight that goes far beyond the trailhead.
