

ABL Diagnostics to Become Exclusive Distributor of VELADX in EMEA for Molecular Diagnostics

WOIPPY, FRANCE, July 29, 2025 /EINPresswire.com/ -- ABL Diagnostics (FR001400AHX6 – ABLD, the “Company”), a Euronext-listed leader in molecular diagnostics, is pleased to announce the signing of an exclusive distribution agreement with VELA Operations Singapore for Europe, the Middle East and Africa (EMEA). The agreement will become fully effective in January 2026, with a non-exclusive transition phase starting July 2025.

> First portfolio: ABL’s core solutions <

ABL has built its expertise over more than 25 years by developing and commercializing advanced solutions for genotyping, molecular detection, and bioinformatics analysis of infectious diseases.

Its DeepChek® and MicrobioChek software platforms, combined with a wide range of PCR and NGS kits, are already used by leading reference centers worldwide.

> Second portfolio: VELA’s automation and CE-IVD product lines <

Through this strategic agreement, ABL will now offer VELA’s full range of automated platforms, CE-IVD PCR/NGS kits, and instruments. This complementary portfolio expands ABL’s reach to high-throughput laboratories seeking automation, standardization, and traceability.

> Third portfolio: Technological synergy <

This partnership also opens the door to strong technological synergies. ABL’s kits and software solutions are being adapted for use on VELA’s automated platforms, enabling laboratories to combine ABL’s scientific depth and flexibility with the automation power of VELA systems. This integration will help enhance customer satisfaction, simplify workflows, and accelerate time to results.

“This alliance is built on a shared ambition: to offer laboratories a global, integrated solution that is future-ready.

By combining VELA’s technology with ABL’s expertise, we are building a uniquely valuable platform for the EMEA region,”

said Dr. Chalom Sayada, CEO of ABL Diagnostics.

“We are excited to partner with ABL Diagnostics, whose scientific credibility, customer proximity and software innovation make them an ideal ally for VELA in EMEA.

Together, we are bringing a highly differentiated offering to laboratories — one that combines quality, flexibility and automation,”

said Sam Dajani, Chairman & Chief Executive Officer, Vela Operations Singapore Pte. Ltd.

The financial terms of the agreement remain undisclosed.

ABOUT ABL DIAGNOSTICS

ABL Diagnostics specializes in proprietary molecular biology assays and end-to-end solutions for precise molecular detection and genotyping:

- UltraGene – real-time PCR-based molecular detection
- DeepChek® – DNA sequencing for genotyping

Expanding Portfolio for Microbiology

- HIV diagnostics – Drug resistance assays, including Whole Genome Kit.
- SARS-CoV-2, Tuberculosis, Hepatitis B & C – Advanced genotyping and drug resistance analysis
- Microbiome & Taxonomy – 16s/18s RNA-based analysis.
- Other viral & bacterial targets – Comprehensive molecular assays.

Syndromic & Digital Solutions

- Syndromic Real-Time PCR assays (known-how and IP acquired in 2025).
- Nadis® – EMR system used in 200+ hospitals in France for HIV & Hepatitis infected patients management.

ABL Diagnostics, based in Woippy, is a public company listed in compartment B of Euronext's regulated market in Paris (Euronext: ABLD – ISIN: FR001400AHX6).

ABOUT VELADX

Vision

To be the leading global provider of integrated IVD test workflows that address the individual testing needs of our customers.

- Striving to be at the forefront of molecular diagnostics

Clinical relevance, laboratory efficiency and cost effectiveness

- Providing IVD solutions to our customers worldwide

A globally supported test portfolio designed and manufactured in accordance with local IVD requirements and regulations

- Leveraging true innovations with diagnostic workflows for both PCR and NGS

Answering the needs of clinicians today and in the future

- Serving our customers with the power of standardized versatility

Broad test solutions adaptable and scalable to individual workflow and volume requirements

Mission

To empower the laboratory to deliver the most relevant research and diagnostic results.

- Customers

We strive to enable each individual customer to provide research results and clinically relevant answers with a high degree of quality, efficiency and cost effectiveness

- Clinicians

We commit to providing solutions that address current and future needs for fast and actionable healthcare information

- Patients

We provide diagnostic solutions that help to improve overall quality of life

- Products

We deliver complete life sciences and IVD solutions based on a broad portfolio of automated PCR and NGS assays, IT connectivity and LIS interface. Our comprehensive solutions provide the high degree of adaptability and workflow versatility laboratories need.
