

# JOYN Group earns ISO/IEC 27001 Certification, Reinforcing Leadership in Information Security and Digital Trust

LISBON, PORTUGAL, July 25, 2025

/EINPresswire.com/ -- JOYN Group, a global IT consulting and digital transformation provider that holds Growin, Fyld, Landskill, Infosistema, and DocDigitizer, proudly announces its official certification in ISO/IEC 27001

— the world's leading standard for information security management systems (ISMS).

This achievement demonstrates JOYN's commitment to cybersecurity excellence, data protection, and risk management across its international operations.

## Securing the Digital Future for Clients Worldwide

As organizations accelerate their digital transformation, the protection of sensitive information has become a top priority. With over 500 consultants delivering projects across 20+ countries, JOYN ensures that data security is at the core of its strategy.

"ISO 27001 isn't just a compliance milestone — it reflects how deeply security is embedded in the way we work," said Gonalo Caeiro, President of JOYN Group.

"Our clients trust us with critical systems and sensitive data. This certification reinforces that trust."

## What ISO 27001 Means for Clients and Partners

The ISO 27001 certification validates that JOYN has implemented a robust, systematic approach to identifying, mitigating, and managing information security risks. Key benefits for clients include:

- Enhanced Data Protection — Confidential and personal data are managed under globally recognized controls.
- Reduced Risk Exposure — Threats are identified early and addressed through proactive security policies.
- Streamlined Compliance — Vendor due diligence becomes faster and more efficient.
- Stronger Competitive Position — Collaborating with a certified partner adds value and assurance in regulated industries.

## Security Built into the Consulting DNA

JOYN embedded the ISO 27001 framework throughout its global consulting workforce — from on-site teams to remote delivery hubs. This enables a unified, security-first culture that spans geographies and project types.

“We’ve aligned our teams around a single goal: delivering secure, reliable solutions with accountability,” said Hugo Pereira, Senior Partner at JOYN.

“ISO 27001 gives us a scalable foundation to grow without compromising on trust.”

## Expanding Capabilities Across Regulated and Global Markets

With the ISO 27001 certification, JOYN strengthens its position as a strategic partner for clients in highly regulated sectors such as:

- Financial services
- Healthcare and life sciences
- Energy and utilities
- Public sector and smart government

It also supports JOYN's expansion into new global markets, ensuring security practices evolve alongside the cybersecurity threat landscape.

## About JOYN Group

Founded in 2015, JOYN is an international IT consulting group helping organizations leverage technology to innovate and perform. With a global team of over 500 consultants, JOYN delivers end-to-end digital solutions in:

- Consulting — IT strategy, staff augmentation, and outsourcing via Growin, Fyld, and Landskill
- Intelligent Automation — AI and automation products including BizAPIs, DMM, and DocDigitizer
- Business Optimization — SaaS and low-code BPM platforms via Uniksystem
