

Blockchain Technology Market Growing at 57.7% CAGR to Hit USD \$797.1 Billion by 2032

The global blockchain market is growing due to crypto popularity, government support, and rising adoption of digital solutions.

WILMINGTON, DE, UNITED STATES, July 25, 2025 /EINPresswire.com/ -- Blockchain technology is an advanced database method that allows transparent information sharing within a business network. It stores data in linked blocks, forming a chain where

information is tamper-resistant without network consensus. This ensures data integrity, making blockchain ideal for creating immutable ledgers to track orders, payments, accounts, and other transactions. Built-in safeguards prevent unauthorized entries and ensure consistency across the network's shared records.

According to the report, the <u>blockchain technology market</u> was valued at \$12.5 Billion in 2023 and is estimated to reach \$797.1 Billion by 2032, growing at a CAGR of 57.7% from 2024 to 2032.

Growing demand for decentralized financial solutions and the integration of blockchain technology into a variety of industries are expected to provide ample opportunities for market growth during the forecast period. However, lack of a skilled workforce and clarity about regulations act as restraints for the blockchain technology market.

Recent Industry Development:

1. In May 2023, Goldman Sachs Group Inc, Microsoft Corp, and Deloitte collaborated with Cboe Global Markets Inc., for development in a new blockchain system aimed at linking disparate institutional applications, potentially encouraging broader adoption of distributed ledger

technology in financial markets.

2. In July 2022, SAP APJ launched a pilot of GreenToken, using blockchain technology to boost sustainable outcomes and increase circularity in the chemicals industry by better recovering waste plastics.

By enterprise size, the large enterprises segment held the highest market share in 2023. Large enterprises operating in industries such as insurance, financial services, healthcare, and supply chain are increasingly making attempts to digitalize their offerings, which is creating a need for blockchain technology among them.

By application, the payments segment held the highest market share in 2023. Blockchain technology increases payment system efficiency, lowers operational costs, and provides transparency. These advantages of blockchain technology are expanding its application in payment systems, hence driving segment development.

By component, the platform/component segment held the highest market share in 2023 as it enables the creation and operation of decentralized applications (DApps) and smart contracts. Several companies provide blockchain solutions that are specifically designed for enterprise use cases, addressing requirements such as permissioned networks, regulatory compliance, and interaction with current enterprise systems.

By type, the public cloud segment held the highest market share in 2023, as public cloud providers offer a scalable and cost-effective infrastructure for deploying blockchain solutions. This scalability and cost efficiency is vital as blockchain networks grow and require additional resources to support increasing transaction volumes.

Based on region, North America held the highest market share in terms of revenue in 2023 and is expected to dominate in terms of revenue during the forecast period. With rise in adoption of digital technologies in several sectors, the market is expected to expand significantly in the coming years.

Major Industry Players: -

Microsoft Corporation IBM Corporation Oracle Corporation Intel Corporation R3 Accenture NTT DATA Infosys SAP SE AWS

The report provides a detailed analysis of these key players in the global blockchain technology market. These players have adopted different strategies such as new product launches, collaborations, expansion, joint ventures, agreements, and others to increase their market share and maintain dominant shares in different regions. The report is valuable in highlighting business performance, operating segments, product portfolio, and strategic moves of market players to showcase the competitive scenario.

Thanks for reading this article; you can also get individual chapter-wise sections or region-wise report versions like North America, Europe, or Asia.

If you have special requirements, please tell us, and we will offer you the report as per your requirements.

Lastly, this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients in making strategic business decisions and achieving sustainable growth in their respective market domains.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies. This helps us dig out market data that helps us generate accurate research data tables and confirm the utmost data procurement methodology includes deep presented in the reports published by us is extracted through primary interviews with top officials from leading online and offline research and discussion with knowledgeable professionals and analysts in the industry.
