What Sets Window Mart's Windows Apart?

>> UPVC Blend: Perfect for the Canadian Climate

At Window Mart, their windows and doors are made of a 100% lead-free UPVC blend. This advanced composition provides excellent resistance to impact, cracking, and discoloration. As a result, their windows remain strong and attractive after years of exposure to harsh weather conditions.

>> Enhanced Energy Efficiency

Each window is equipped with a fully sealed glass unit with a standard overall thickness of 13/16 inch and the highest number of internal air chambers. This unique design gives Window Mart's windows and doors outstanding insulation and sound abatement properties and maximized energy and thermal efficiency. This helps to maintain a comfortable indoor temperature and quieter environment while reducing energy costs.

>> Fusion Welding—A Strong Foundation for Windows

Another prominent feature of Window Mart's products is fusion welding, which is designed to ensure airtight and watertight frames. This advanced construction method not only prevents air and water infiltration but also significantly improves the overall strength and structural integrity of the frame.

>> Low-Maintenance and Stylish
