

Naqi Logix's Naqi Neural Earbud Wins Prestigious TWICE VIP Award 2025

Neural Technology Pioneer Continues Industry Leadership with Consumer-Driven Recognition

VANCOUVER, BC, CANADA, July 29, 2025 /EINPresswire.com/ -- Naqi Logix, a leader in neural interface technology, proudly announces that its flagship Naqi Neural Earbud has been selected again as a winner in the prestigious TWICE VIP Awards 2025 in the Innovative Tech category. This recognition reinforces the company's position as the leader in consumer neural technology and human-machine interface innovation.

The TWICE VIP Awards represent the gold standard in consumer electronics recognition, celebrating products with exceptional features, superior design, and outstanding value. [Winners](#) are chosen exclusively by TWICE magazine's expert readership through a consumer-driven voting process.

Naqi Logix Innovation Tech Award Winner for TWICE VIP 2025 Award

Naqi Logix Logo

"We are deeply honored to receive the TWICE VIP Award 2025," said Sandeep Arya, Chief Business Officer at Naqi Logix. "Naqi Logix is proud to lead the industry with neural technology that removes barriers and bridges people with devices. The Naqi Neural Earbud makes technology truly accessible through natural, intuitive gestures. When you can control your digital world with something as simple as the tilt of your head or blink of your eye, it's a 'No Brainer'. This is the future standard of human-machine

The Naqi Neural Earbud represents a paradigm shift in Human Machine Interface (HMI) technology. Unlike traditional methods requiring touch, voice, or visual interaction, this device reads subtle facial micro-gestures, head tilts, eye blinks, and natural movements, then seamlessly translates them into precise device commands.

Engineered to integrate with existing earbuds, Naqi Logix's patented technology enables users to control computers, smart home systems, gaming platforms, robotic systems, and AR/VR environments. This breakthrough provides a practical, [non-invasive alternative to brain implants](#) while transforming accessibility and independence across all demographics.

Applications span multiple industries: empowering individuals with mobility challenges, revolutionizing gaming experiences, and enhancing professional productivity. By making advanced neural interface technology accessible through familiar earbud form factors, Naqi Logix has democratized what was once science fiction.

Market Validation Through Experts:

The TWICE editorial team highlighted this year's exceptional competition quality: "One thing that makes the TWICE VIP Awards so unique is that it isn't a public vote by people who know nothing about the submissions or the industry. No, the awards are voted on by the industry leaders, consumer tech retailers, and distributors who know greatness, innovation, and what makes the biggest difference in the business. Earning the respect of your peers is a hard-won accomplishment, especially in our industry, and I am proud to be a part of the 2025 TWICE VIP Awards."

Among hundreds of entries, the Naqi Neural Earbud distinguished itself through intuitive user experience, broad accessibility applications, and groundbreaking neural interface capabilities. This award adds to Naqi Logix's growing industry recognition, establishing the company as the thought leader in practical neural technology applications. LG Electronics, Sony Electronics and Panasonic also won in various categories. Here is the complete list of the other winners.

The advertisement features a black background with a large, sleek, black earbud in the center. A smaller, more detailed view of the earbud is shown to its right. In the top right corner, the website 'NaqiLogix.com' is displayed above a QR code. The bottom section of the ad has a red background with white text. The text reads: 'Hands-Free', 'Voice-Free', 'Screen-Free', followed by the 'NAQI LOGIX' logo and the tagline 'Bridging People with Devices'. Below this, in a white box, is the text: 'Naqi Logix Creating Technologies that Bridge People and Devices - Everyone's Superpower!'.
