Biopolymers Global Market Report 2025

What Drives The [Biopolymers Market](#)'s Growth?

The biopolymers market has grown rapidly in recent years, with its value rising to \$20.04 billion in 2025 from \$17.57 billion in 2024 at a robust CAGR of 14%. Expansion has been fuelled by environmental concerns, advancements in biopolymer technology, escalating demand for eco-friendly packaging, increasing awareness of biodegradable alternatives, and a growing preference for sustainable products.

How Much Further Growth Can We Expect In The  
Biopolymers Market?

In the coming years, the market for biopolymers is  
anticipated to grow exponentially, ballooning to \$33.46

billion by 2029 at a CAGR of 13.7%.

The major drivers for this expansion during the forecast period include:

- Innovations in bio-based raw materials
- Investments in biopolymer research and development
- Expanding applications in automotive and construction sectors
- Increasing adoption of circular economy practices
- Rising demand for biocompatible medical materials
- Advancements in 3D printing using biopolymers.

Prominent trends during this period include growing popularity of high-performance bioplastics

and development of hybrid biopolymers.

What Is The Role Of Plastic Pollution Awareness In Market Growth?

Increasing awareness of the damaging impact of plastic pollution is a major driver of growth in the biopolymers market. The term refers to the accumulation of plastic waste in the environment, which harms ecosystems, wildlife, and human health. This awareness is driven by environmental campaigns, media coverage, research on long-term impacts, and government regulations. Amid this growing concern, biopolymers play a pivotal role as they highlight the need for sustainable alternatives to plastic and lead the charge for a reduction in plastic waste. For instance, as of June 2024, the EU had adopted new rules targeting plastic marine litter, including a target of 25% recycled content in plastic bottles by 2025 and 30% by 2030.

Who Are The Leading Companies In The Biopolymers Market?

Major players in this market include BASF SE, Mitsubishi Chemical Corporation, Braskem S.A, Arkema S.A., Solvay S.A., and others. These companies are at the forefront of advancements and innovations.

What Trends Are Emerging In The Biopolymers Market?

Companies in the biopolymers market are innovating by developing semi-crystalline polyhydroxyalkanoate PHA biopolymers. These biodegradable plastics, derived from natural resources, offer higher heat stability and rigidity than their amorphous counterparts. Such PHA biopolymers are found in applications where thermal resistance and structural strength are required, including packaging, agricultural films, and durable goods.

How Is The [Biopolymers Market Segmented](#)?

The biopolymers market explored in this report is segmented on various basis:

Products: Bio-Polyethylene Terephthalate, Bio-Polyethylene, Biodegradable Polyesters, among others.

Applications: Films, Bottle, Fibers, Seed Coating, Vehicle Components

End-Use: Packaging, Consumer Goods, Automotive, Textiles, Agriculture

Subsegments: Vary, from Bio-PET Bottles to PTT Resins

Which Region Holds The Largest Share In The Biopolymers Market?

Asia-Pacific held the largest share in the biopolymers market in 2024 and is predicted to be the fastest-growing region during the forecast period. The report covers other regions including Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa.
