

AKITO Launches: AI-Powered Workforce Platform Built for Canada's Future

Canada's DIGITAL Innovation Cluster co-invests in the cutting-edge solution for employers, job-seekers and career tech companies

CALGARY, ALBERTA, CANADA, July 28,

2025 /EINPresswire.com/ -- A new

national initiative is redefining how Canadian employers and job seekers connect, grow, and adapt to an

evolving economy. [AKITO](#), developed by Advancerite Technologies in collaboration with five other

consortium members and supported

by [DIGITAL](#) (Canada's Global Innovation Cluster for Digital Technologies), is an AI-powered workforce CareerTech development platform that helps employers identify and retain job-ready talent while guiding individuals toward meaningful, in-demand careers, all powered by labour market intelligence.

“

The AI core behind AKITO is powered by Staque's Que autonomous AI framework. It's built to generate insights that are actionable, scalable, and inclusive.”

*Dr. Muhammad Khan, Staque
CEO*

"AKITO" in Japanese means "bright person rising". As the name suggests, AKITO offers intelligent role-matching, skill-gap analysis, and personalized learning recommendations, all powered by real-time labour market data. For employers, AKITO streamlines the hiring process by surfacing candidates who are not only aligned by skillset but also by strategic fit. For job seekers, the platform provides a clear pathway from where they are to where the market is headed, connecting them with targeted

upskilling, career tools, and work-integrated learning experiences.

Developed through a national consortium including Staque, Riipen, UNBC, Economic Development Lethbridge, and Uggenti Digital, AKITO is grounded in collaboration and built for impact.

AKITO consortium partners gathered at the launch event

"The opportunity for Canadian companies to leverage targeted, data-driven solutions for the recruitment and retention of skilled talent is critical to the competitive growth of Canadian industry," said Nadia Shaikh-Naeem, Vice President of Programs at DIGITAL. "DIGITAL is proud to support national initiatives like AKITO that are bridging the gap between industry needs and workforce capabilities through AI-powered CareerTech solutions"

"AKITO brings a powerful layer of intelligence to the entrepreneurial ecosystem," says Renae Barlow, Vice President, Entrepreneurship and Innovation at Economic Development Lethbridge. "By identifying real-time talent and education gaps, it enables employers to build stronger teams, faster. It also equips emerging talent with the skills most needed by businesses today. For a region like ours, this kind of alignment is essential to sustaining momentum and scaling companies with confidence."

"We built AKITO to act as a bridge between talent and opportunity, especially in communities where traditional systems don't move fast enough," says Eyren Uggenti, COO of Advancerite Technologies. "This platform adapts in real time and helps employers and job seekers keep pace with what's next."

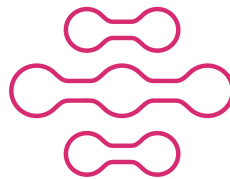

"The AI core behind AKITO is powered by Staques's [Que](#) autonomous AI framework. It was designed to do more than process data; it's built to generate insights that are actionable, scalable, and inclusive," adds Dr. Muhammad Khan, CEO of Staques. "Our goal is to empower every user, employer or job seeker, with a clear growth pathway positioning them for success."

"This partnership will help connect job seekers with real-world opportunities and provide employers with the skilled workforce to fuel innovation and growth," says Dana Stephenson, Co-Founder and CEO of Riipen. "We're proud to help build a more inclusive, accessible, and future-ready workforce for Canada."

Staques: The Tech Stack of Future

Upcoming Programs Powered by AKITO

Our AKITO product is now being used in programs across Canada, including:

- Indigenous Techskillr, a 10-week digital innovation program for Indigenous learners and entrepreneurs
- A CareerTech Accelerator designed for career development organizations and employers to enhance workforce readiness
- Work-integrated learning initiatives delivered in collaboration with Riipen, linking learners directly to employer-driven projects

Details of these programs will be circulated on Advancerite and partner websites and social media. AKITO is more than a platform. It is a people-first, data-smart solution for Canada's evolving workforce. AKITO is building partnerships and integrations with CareerTech, Recruitment and HR Companies in Canada. The platform is also being launched internationally and is currently under early testing. To explore the technology or partner with the AKITO, visit www.advancerite.io/akito.
