

Operating Room Management Market Worth USD 10.0 billion by 2031 at a CAGR of 13.0%

PORTLAND, KS, UNITED STATES, July 30, 2025 /EINPresswire.com/ -- According to the report published by Allied Market Research, the global [operating room management market](#) garnered \$3.5 billion in 2021, and is estimated to generate \$10.0 billion by 2031, manifesting a CAGR of 13.0% from 2022 to 2031. The report provides an extensive analysis of changing market dynamics, major segments, value chain, competitive scenario, and regional landscape. This research offers a valuable guidance to leading players, investors, shareholders, and startups in devising strategies for the sustainable growth and gaining competitive edge in the market.

Factors that drive the growth of the operating room management market include increase in the pricing pressures on hospitals, concerns over growing of healthcare costs, and increase in advantages of using operating room management systems. However, lack of skilled technicians, and high cost of maintenance of systems are negatively impacting the market growth. Conversely, increase in the awareness regarding the advanced technologies offers lucrative opportunities for the growth of the market.

The operating room suite represents one of the most critical hospital units, both in patient safety and financial terms. It is able to provide useful and easy-to-use information by using medical literature indicators for the management of operating rooms. The operating room management model, which is based on a tracking system of relevant events within the surgical path, presents various profiles of information that cover information needs of different professionals like managers, anaesthesiologists, and surgeons. The system supports operating room management by providing a mechanism that enables accurate & quick collection of data on management resources, time, inventory, and cost, and then by analyzing the data. All this increases a need to comprehend the decision-making and metrics that constitute the daily schedule in surgical theatres.

Operating Room Management Market Segmentation Overview:

The research provides detailed segmentation of the global operating room management market based on End User, Solution, Component, and region. The report discusses segments and their sub-segments in detail with the help of tables and figures. Market players and investors can strategize according to the highest revenue-generating and fastest-growing segments mentioned

in the report.

Based on end user, the hospitals segment held the highest share in 2021, accounting for nearly two-thirds of the global operating room management market, and is expected to continue its leadership status during the forecast period. Moreover, the same segment is expected to register the highest CAGR of 13.2% from 2022 to 2031.

Based on solution, the data management and communication solution segment accounted for the highest share in 2021, contributing to nearly one-thirds of the global operating room management market, and is expected to maintain its lead in terms of revenue during the forecast period. Moreover, the same segment is expected to manifest the highest CAGR of 13.9% from 2022 to 2031.

Based on component, the software segment accounted for the highest share in 2021, holding nearly three-fifths of the global operating room management market, and is expected to continue its leadership status during the forecast period. Moreover, the same segment is estimated to grow at the highest CAGR of 13.2% during the forecast period.
