

# Environmental Consulting Team Publishes Soils Guide

*People should know what they're standing on and feel safe about their soil.*

WILKES-BARRE, PA, UNITED STATES, July 31, 2025 /EINPresswire.com/ -- [B.F. Environmental Consultants](#) (BFE), an environmental consulting and education firm providing a range of services throughout the Northeast, announced today the publication of a new booklet entitled "Guide to Soils: The Vital Life-Giving Layers Beneath Our Feet." Authored by licensed geologists Brian Oram, founder of BFE, and Dr. Brian Redmond, the guide distills over 30 years of applied experience in geology, soil science, and environmental consulting into an engaging and accessible format.

"Whether you're studying for professional licensure, working in agriculture, engineering, or environmental science, preparing for an Envirothon, or simply curious about the world beneath us, this book delivers a practical yet profound understanding of soil formation, classification, and evaluation," Oram said.

Guide to Soils is more than a textbook—it's a field-ready companion for students, professionals, and anyone fascinated by the rich complexity of the soil that supports life on Earth.

It introduces the intuitive and memorable "POT

Process"—Prepare, Observe, Translate—designed to help users assess soils in real-world applications. Rich with illustrations, field-tested insights, and plain-language explanations, Guide to Soils is an essential resource for anyone who wants to understand and work with Earth's most

overlooked, life-giving system.

"This booklet was written by a soil scientist/geologist with decades of practical experience," Redmond said. "Its primary purpose is to provide an introduction to the practical application of soil science in real-world problems while including sections of interest, with a bit of whimsy, to more experienced professionals. Readers of all levels should be able to find it interesting and useful."
