

Nex-Tech Wireless Purchases Kansas Spectrum Assets from US Cellular

Nex-Tech Wireless is working to bring even better wireless service to communities across Kansas.

HAYS, KS, UNITED STATES, August 4, 2025 /EINPresswire.com/ -- [Nex-Tech Wireless](https://www.einpresswire.com/2025/08/04/nex-tech-wireless-is-working-to-bring-even-better-wireless-service-to-communities-across-kansas/) is working to bring even better wireless service to communities across Kansas. The company has announced an agreement with US Cellular to acquire additional spectrum in the 700 MHz band. This agreement is about boosting network capacity. It does not involve any changes to customer accounts, phone numbers, or services and there is no action required by current Nex-Tech Wireless or US Cellular customers. This move means stronger signal, faster data speeds, and improved coverage across central Kansas.

“We’re proud to keep investing in the communities we call home,” said Jon Lightle, President and CEO of Nex-Tech Wireless. “This new spectrum is like adding more lanes to the highway. It helps us handle more traffic with quality connections, right where customers need it most.”

Here’s what customers can expect:

- Improved connectivity even in rural areas and inside buildings
- Faster connections for streaming, gaming, and video calls
- Room to grow as more devices and new tech hit the market
