

The Buzz Marketing Presents Voltage Monitor: Smart Home Electrical Protection System

Revolutionary device monitors voltage, detects faults, and protects electrical systems in real time.

FORT LAUDERDALE, FL, UNITED STATES, August 1, 2025 /EINPresswire.com/ --

[The Buzz Marketing](#) announces the licensing availability of Voltage Monitor, a cutting-edge home electrical monitoring system that enhances power safety, system performance, and homeowner peace of mind. This patented solution is now available for exclusive licensing to qualified manufacturers seeking to capitalize on the growing demand for smart home infrastructure and electrical protection systems.

Proven Market Solution with Strong Commercial Potential

Voltage Monitor is engineered to monitor voltage, amperage, and continuity directly at the service entry point, replacing the standard connection between a building's service conductors and the utility feed. The system features an intuitive, color-coded digital interface that allows homeowners and electricians to instantly detect and pinpoint faults—including which side of the system is affected. In the event of a dangerous surge or anomaly, the unit can shut down power automatically to protect all downstream components.

Addressing Multi-Billion Dollar Market Opportunity

The smart home market is projected to surpass \$200 billion by 2027, with electrical safety and energy management solutions gaining rapid adoption. Voltage Monitor is uniquely positioned to meet both residential and light commercial needs, addressing the increasing demand for smarter, safer power systems.

Key Features

The compact, robust system includes live readouts for voltage and amperage, built-in fault detection, side-specific fault display, and automatic shutoff protection. The primary unit installs at the service point and connects to a larger digital panel display for ongoing monitoring. The

user-friendly design reduces risk, simplifies diagnostics, and adds a valuable upgrade option for builders, electricians, and home automation providers.

Ready-to-License Innovation

Ideal for electrical equipment manufacturers, smart home solution providers, utility suppliers, and home safety brands, Voltage Monitor is fully patented and ready for production. Its streamlined design and broad market application make it an attractive addition to any product portfolio.

Licensing Opportunity for Forward-Thinking Manufacturers

The Buzz Marketing team is actively seeking licensing partners with the manufacturing capacity and distribution channels to bring Voltage Monitor to market. We specialize in identifying commercial-ready technologies with real-world applications, and Voltage Monitor represents a timely opportunity for expansion in the smart energy sector.

Strong Market Position and Revenue Potential

With patent protection secured and a growing demand for integrated electrical monitoring, Voltage Monitor offers immediate value to any portfolio. This product is production-ready and ideal for early entry into a competitive, expanding market.

About The Buzz Marketing

The Buzz Marketing is a premier licensing agency that connects innovative patented products with leading manufacturers across multiple industries.
