

Morn BM Launches Innovative Cuttable Printed Glass: A Game-Changer for the Architectural Glass Industry

QINGDAO, CHINA, August 4, 2025

/EINPresswire.com/ -- Morn Building Materials (Morn BM), a leading [architectural glass solution](#) provider, proudly announces the launch of its revolutionary new product: Cuttable Printed Glass. This breakthrough innovation addresses long-standing challenges in the printed glass market, offering unmatched flexibility, durability, and efficiency for glass processors worldwide.

Printed glass—whether back-painted glass, ceramic frit glass, or digitally printed glass—has long played a vital role in modern architecture and interior design. However, these traditional forms of printed glass come with significant limitations: susceptibility to fading, scratching, high costs and restricted post-processing capabilities. Most importantly, they are typically not cuttable after printing, posing challenges for customization and increasing production costs for glass processors.

Morn BM's new Cuttable Printed Glass turns these limitations on their head.

"This product represents a major leap forward," said Mr. Han Xiaoqing, General Manager of Qingdao Morn BM. "We've developed a printed glass solution that not only offers permanent patterns with no fading or scratching but can also be cut and tempered by glass processors themselves. It's more cost-effective, easier to store, and helps our customers fulfill more orders in less time."

Morn BM-Cuttable printed glass

Key Advantages of Cuttable Printed Glass:

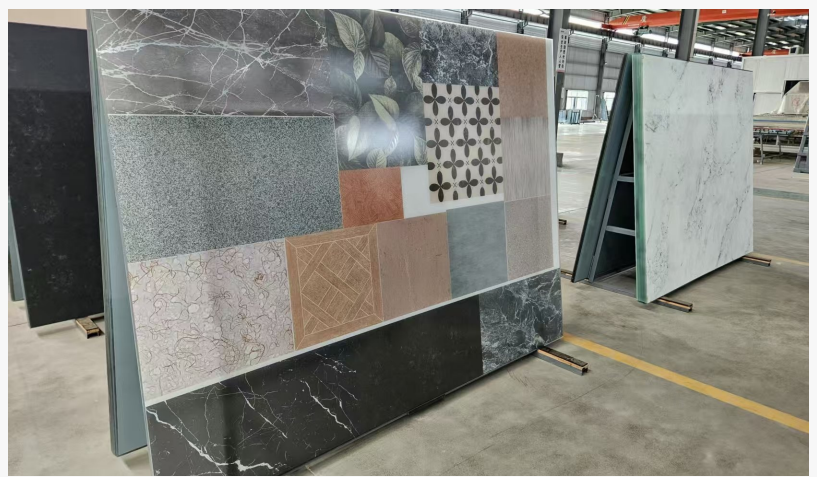

a. **Cuttable & Temperable:** Unlike conventional printed glass, Morn BM's product can be cut and tempered after the printing process—streamlining manufacturing and reducing waste.

b. **Permanent & Durable Patterns:** The printed designs are highly resistant to fading, scratching, and environmental wear, ensuring long-lasting aesthetic appeal.

c. **Lower Production Costs:** By

eliminating the need for in-house printing equipment and processes, glass processors can significantly reduce costs and improve workflow efficiency.

d. **Simplified Storage & Inventory:** Since the glass can be printed in bulk and customized later, storage becomes easier and more versatile for various design applications.

Customized patterns are available in Morn BM

Versatile Applications

Designed with flexibility in mind, Cuttable Printed Glass can be used across a wide range of architectural and decorative applications. These include:

a. Kitchen backsplashes and countertops

b. Interior and exterior wall cladding

c. Furniture design

d. [Shower doors](#) and bathroom partitions

e. Commercial and residential decor

With the ability to easily customize patterns, this glass product is a superior alternative to traditional materials such as marble, tiles, and wood, as well as conventional glass treatments like silk screen printing, digital printing, and back painting. Additionally, when combined with other treatments like acid etching, Morn BM's glass can be transformed into a piece of glass art—opening up new creative possibilities for designers and architects.

A Complete Architectural Glass Solution

The launch of Cuttable Printed Glass further solidifies Morn BM's reputation as a full-service provider of high-performance architectural glass. The company already offers a comprehensive portfolio, including:

Tempered glass, Laminated glass, Insulated glass, and [Vacuum insulating glass](#), one of the most advanced energy-saving solutions on the market today

With this latest innovation, Morn BM aims to support the evolving needs of glass processors,

architects, designers, and construction professionals across global markets.

"Our goal is to make life easier for glass processors while helping them achieve better results, faster," Mr. Han added. "Cutable Printed Glass is not just a product—it's a solution."
