What Is SEO?

SEO, or Search Engine Optimization, is the process of improving a website's visibility in search engines like Google. When done effectively, SEO helps businesses appear higher in organic (non-paid) search results for terms related to their products or services. This includes optimizing website content, technical performance, user experience, and acquiring authoritative backlinks from other trusted websites.

Local SEO focuses specifically on improving rankings within a geographic area, such as Cincinnati, helping businesses show up in map listings, local packs, and location-based keyword searches. For service businesses, SEO is often the most cost-effective way to generate consistent inbound leads.
