

Impact Security Supports Nonprofit Organizations Through FEMA's 2025 Nonprofit Security Grant Program

Grant-eligible retrofit glazing solutions are available for faith-based institutions, schools, and community centers nationwide.

MARIETTA, GA, UNITED STATES, August 5, 2025 /EINPresswire.com/ -- [Impact Security](#), a nationwide provider of retrofit security glazing solutions, announces its support for at-risk nonprofit organizations applying for FEMA's Fiscal Year 2025 [Nonprofit Security Grant Program \(NSGP\)](#). The

federal program provides funding to strengthen the physical security of nonprofit facilities facing elevated threats from terrorism and extremist activity.

Impact Security, LLC.

The NSGP helps faith-based institutions, nonprofit schools, private educational facilities, and community centers implement target hardening measures that protect building occupants and deter forced-entry attempts. These measures may include access control, surveillance systems, and physical reinforcements such as security glazing.

We are pleased to support nonprofit organizations with retrofit glazing solutions that align with FEMA's grant objectives."

*Mark Mineer, President of
Impact Security*

With a tight deadline approaching, states must submit their NSGP funding requests to FEMA by August 11, 2025. Following that, individual states will release their Notices of Funding Opportunity (NOFOs), setting application

deadlines and requirements for eligible sub-recipients. Nonprofit leaders are encouraged to begin the application process immediately to ensure proper documentation is submitted on time.

"Every day, our team focuses on protecting people and property from real and evolving threats,"

said Mark Mineer, President of Impact Security. “We are pleased to support nonprofit organizations with retrofit glazing solutions that align with FEMA’s grant objectives. Our DefenseLite® systems are engineered to delay forced entry and serve as a vital component in any facility hardening strategy.”

Impact Security provides grant-eligible retrofit security glazing systems that are designed to install over existing doors and windows without requiring complete replacement. This makes them a practical, non-intrusive option for older or architecturally significant buildings. DefenseLite® Pro, RiotLite®, and BulletShield™ systems help safeguard entry points, reception areas, and other gathering spaces while preserving the original appearance of the facility.

In support of NSGP applicants, Impact Security offers site assessments, security glazing recommendations, and the documentation needed for grant applications—including CSI 3-Part Product Specifications, scope of work descriptions, and budget estimates. These materials can streamline the application process and demonstrate compliance with FEMA’s physical security enhancement criteria.

NSGP-Eligible Organizations Include:

- Nonprofit and private K–12 schools
- Faith-based institutions (churches, synagogues, mosques)
- Nonprofit community centers and cultural organizations

Nonprofit organizations seeking guidance on retrofit security solutions or needing documentation to support their grant submission are encouraged to contact grantsupport@defenselite.com.
