

Family HVAC Leads the Way in R-454B Refrigerant Transition for Doylestown, PA

DOYLESTOWN, PA, UNITED STATES, August 4, 2025 /EINPresswire.com/ -- Doylestown, PA – Family HVAC, a leading provider of residential and commercial [HVAC services in Doylestown](#), Pennsylvania, proudly announces its recent participation in the EPA A2L R-454B Refrigerant Changeover Conference held on January 9, 2025, at the Hard Rock Casino in Atlantic City. The event brought together industry experts, manufacturers, and regulatory officials to discuss the future of sustainable refrigerants in HVAC systems.

Driving Innovation in the Doylestown HVAC Industry

As the HVAC industry undergoes a major transformation, Family HVAC is staying at the forefront by actively participating in educational events that focus on environmental innovation. The recent conference centered on the shift from R-410A to the more eco-conscious R-454B refrigerant, a low-GWP solution that's set to reshape the future of air conditioning and heat pump systems.

For decades, R-410A has been the industry standard, but due to its high global warming potential (GWP), it's being phased out in 2025. R-454B, a next-generation refrigerant with a GWP of just 465 (compared to R-410A's 2088), is now emerging as the environmentally preferred alternative. This change aligns with federal regulations under the Kigali Amendment to the Montreal Protocol, which seeks to phase down harmful hydrofluorocarbons (HFCs).

Educating and Preparing for the Future of HVAC in Bucks County

By attending this national refrigerant conference, the Family HVAC Doylestown team gained

GEARING UP FOR THE FUTURE!

As of Jan 9, 2025

The Family HVAC Team attended the A2L R-454B Changeover Conference at Hard Rock Casino, Atlantic City.

KEY TAKEAWAYS FROM THE EVENT

- Learning about EPA's A2L R-454B refrigerant regulations
- Engaging with top HVAC manufacturers & EPA experts
- Staying ahead to provide you the best service!
