

New IT-Conductor FLUX™ Version Simplifies Post-Copy Automation Across SAP Landscapes including Cloud ERP Private Edition

IT-Conductor FLUX™ now supports all ABAP deployments of SAP on both Linux and Windows for all Database platforms, compatible with SAP Cloud ERP Private Edition

CUPERTINO, CA, UNITED STATES, August 5, 2025 /EINPresswire.com/ -- IT-Conductor announces the release of IT-Conductor FLUX™ v0.1.4, the latest

version of its SAP-native post-copy automation tool. This update introduces key enhancements designed to improve flexibility, usability, and user autonomy, while maintaining FLUX™'s core strength: simplifying and accelerating post-refresh tasks in SAP environments, including SAP Cloud ERP Private Edition (formerly SAP RISE).

“

Our SAP customers and partners have saved over 80% of time and effort in their ABAP system refresh PCA tasks for all SAP deployment scenarios in on-premises, cloud, or SAP Cloud ERP private edition”

Linh Nguyen, IT-Conductor CEO & Co-founder

FLUX™ v0.1.4 builds on the foundation of earlier versions, continuing to operate entirely within SAP GUI, with no OS-level access required. It's ideal for SAP Cloud ERP customers and managed hosting environments where traditional tools fall short.

The new version v0.1.4 introduces several important improvements:

- Cross-Platform Support: FLUX™ can now run on both Linux and Windows-based SAP systems.

- Configurable Export Directory: Users can override the default DIR_TRANS location for more control over data export storage.

- Background Job Execution: All package exports/imports now run as SAP background jobs, improving scalability and performance.

- Job Log Access via SAP: Users can download background job logs directly through the SAP GUI,

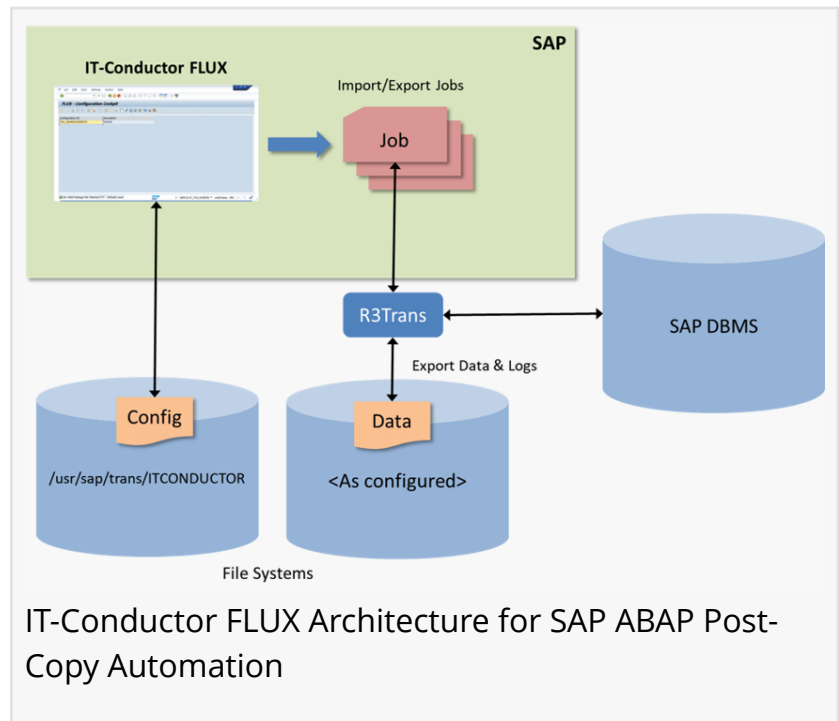

Revolutionize your SAP Operations with IT-Conductor FLUX

without requiring OS access.

Key Features of FLUX™

- * FLUX™ offers a broad set of capabilities designed specifically for post-copy and system refresh workflows:
- * Post-Refresh Automation: Automatically restores technical configurations, batch jobs, and integration settings.
- * Selective Client & Config Copy: Supports copying key settings while preserving client data where needed.
- * Custom Package Creation: Packages can be tailored to meet unique business or landscape requirements.
- * Detailed Logging: Full visibility and audit-friendly logs available directly within SAP.

No External Infrastructure Required: Delivered via SAP transport and installed without SAINT (SAP Add-on Installation Tool).

“Our SAP customers and partners have saved over 80% of time and effort in their ABAP system refresh PCA tasks for all SAP deployment scenarios in on-premises, cloud, or SAP Cloud ERP private edition” - Linh Nguyen, IT-Conductor CEO & Co-founder

Why FLUX™ Matters for SAP Cloud ERP

For SAP Cloud ERP customers, refresh operations are often time-consuming and restricted due to limited system-level access. FLUX™ solves this by offering a fully SAP-native approach to post-copy automation. It empowers Basis teams to complete refreshes quickly and consistently—even in hosted or managed environments where traditional tools can't run.

By reducing refresh time from days to under 3 hours, FLUX™ helps businesses accelerate testing cycles, reduce manual errors, and keep projects on track—all while staying compliant with SAP Cloud ERP hosting policies.

FLUX™ is also available on the SAP Store, making it easy for teams to access, evaluate, and deploy.
