

Coastal Pipeline Inc. Expands PG&E-Certified Electrical Conduit, Gas, and Fire Line Installations in Monterey County

Monterey-based underground utility contractor adds electrical conduit, gas, and fire line services to support infrastructure growth and code compliance.

MONTEREY, CA, UNITED STATES, August 7, 2025 /EINPresswire.com/ -- Coastal Pipeline Inc., a certified general engineering contractor specializing in underground infrastructure, has expanded its service capabilities to include PG&E-certified Electrical Conduit Installations, Gas Line Trenching, and Fire Line Construction across Monterey, Santa Cruz, and San Benito Counties.

This strategic expansion supports the region's growing demand for safe, code-compliant utility systems essential for commercial, residential, municipal, and industrial infrastructure development.

Coastal Pipeline Inc.

[New Underground Utility Services Now Offered:](#)

Electrical Conduit Line Services

Coastal Pipeline now provides trenching and installation of underground PVC conduit systems for electrical, lighting, and telecom infrastructure. As a [PG&E Applicant Installer Operator Qualified \(OO\) contractor](#), the company ensures all conduit systems meet stringent utility and safety standards, including encasement in concrete or protective sleeves where required by code.

Gas Line Services

We've expanded these services to meet the increasing infrastructure needs across California's Central Coast"

Alejandro Aragon

Specializing in the installation of underground PE gas pipelines, Coastal Pipeline offers full trenching, tracer wire installation, protective warning tape placement, and system installation in compliance with PG&E construction and safety protocols. All operations are overseen by PG&E-certified Applicant Installer OQ personnel to ensure adherence to utility specifications.

Fire Line Services

The company delivers [complete fire line infrastructure solutions](#), from trenching and installation to backflow prevention device installation and testing. California-Nevada AWWA-certified technicians ensure that all fire protection systems supply hydrants and suppression systems in accordance with local fire code and water flow requirements.

"We've expanded these services to meet the increasing infrastructure needs across California's Central Coast," said Alejandro Aragon, owner of Coastal Pipeline Inc. "Our team is committed to delivering durable, compliant utility systems that meet public safety and development standards."

Supporting Energy, Safety, and Infrastructure Demands

With the addition of electrical conduit, gas line, and fire line capabilities, Coastal Pipeline Inc. strengthens its role as a trusted partner to developers, contractors, utility providers, and municipalities. The expanded offerings support:

- Utility tie-ins and trenching compliant with PG&E and local codes
- Fire protection infrastructure with certified backflow prevention
- Reliable gas distribution systems for public and private facilities
- Emergency pipeline repair and restoration to minimize service disruptions

These enhancements come at a pivotal time, as California's Central Coast experiences rapid growth and rising energy and infrastructure demands. According to the U.S. Energy Information Administration, statewide energy and gas consumption continue to climb alongside population growth—placing added pressure on underground utility systems.

"More project owners and municipalities are requiring certified crews who can manage everything from trenching to testing to inspections," Aragon added. "That's where Coastal Pipeline leads."

About Coastal Pipeline Inc.

Based in Seaside, California, Coastal Pipeline Inc. is a certified general engineering contractor specializing in underground utilities, excavating, and paving across Monterey, Santa Cruz, and San Benito Counties. The company provides end-to-end infrastructure solutions, including sewer and water lines, storm drain systems, electrical conduit, gas distribution, and fire protection pipelines.
